

IMPERIAL[®] DABMAN 30

DAB+ Radio

Up-to-date digital radio combined with retrodesign. Behind the 70s style of the DABMAN 30 lies cutting-edge digital radio technology. The radio combines the looks of a traditional FM receiver with the advantages of a modern digital broadcast receiver. The crystal clear stereo sound offers pure listening pleasure – no matter if you listen to your favourite FM station or a DAB+ channel. Besides traditional functions, e.g. alarm function or station scan mode, the IMPERIAL DABMAN 30 supports all benefits of digital radio, such as radiotext which is shown on the illuminated Dot-Matrix display. You would like to listen to songs from your MP3 player over the DABMAN 30? No problem – the AUX in allows to connect external devices, e.g. MP3 players or iPods to the radio via cable (not included).
