

Elegant Adapter for Upgrading a HiFi System

IMPERIAL® DABMAN i410 BT

FULL STREAMING POWER INCLUDED! *

* If supported by the provider and software.

The IMPERIAL DABMAN i410BT is the perfect solution to future-proof your stereo system. This elegant adapter is designed not only to receive DAB+ digital radio, Internet radio and FM radio, but also to play music via various streaming providers. Furthermore, you can play music from network hard drives via UPnP, USB sticks or via Bluetooth from your smartphones and tablet PCs - the DABMAN i410 BT offers limitless possibilities. In addition to the wide range of music playback options, the adapter offers many additional features. These include the integrated equaliser, the alarm clock function, the sleep timer function and much more.

Highlights

- DAB+, FM & Internet radio reception
- Fast access to a wide range of music streaming services (Amazon Music, deezer, napster, qobuz, Soundmachine, Tidal, High Res Audio, PalcoMP3 & Calm Radio) Login or subscription may be required.
- Bluetooth transmit & receive function, UPnP, 2.4 GHz WiFi integrated
- Activatable hotel mode secures important settings & prevents operating errors
- USB (recording, media player, charging function)
- Favourite memory: 100 DAB+ stations, 100 FM stations, 500 Internet radio stations
- Time display, alarm clock, sleep timer
- Large 8.1 cm (3.2") colour display (illuminated, dimmable & night mode)
- Unlimited reception of FM and DAB+ stations- Controllable via enclosed remote control, on the device and via free Soundmate app (iOS & Android).

In addition to Bluetooth reception, the radio also supports a Bluetooth transmission function. This makes it possible to play music on Bluetooth-enabled devices such as headphones or speakers. The 3" colour display presents current background information on the radio station being played, enables uncomplicated operation through the simply structured menu and can provide the user with weather information. The IMPERIAL DABMAN i410 BT can be operated with the remote control included in the scope of delivery, via the buttons on the device or with the free smartphone app (Soundmate Controller).
