

INTERNETRADIO

INTERNETRADIO

- provides access to thousands free Internet radio stations

UPnP/DLNA

- Connecting with other UPnP/DLNA devices

Medioplayer

- Playback of audio files via USB (MP3 etc.)

IMPERIAL® i110

The IMPERIAL i110 is an internet radio featuring solid acoustic properties. Being able to receive up to 10.000 web radio stations worldwide via the internet, in addition the i110 comes up with a variety of useful functions: the 2.8 inch colour display indicates station information and time as well as valuable additional features, such as daily weather reports. By embedding the i110 into a home network via the internal WiFi module, the radio can be used to play back music files (e.g. MP3, WMA) from NAS drives and computer storages via UPnP. It also supports USB playback mode from USB sticks and other data storage devices. Features such as alarm clock, snooze mode and remote control via smart phone application (optional) also belong to the i110`s portfolio of functions. In sum: the IMPERIAL i110 is an ideal everyday companion.
