SVB7735 Automatic switch box.

This package contains the following:
 - 1 SVB7735 automatic switch box.
 - 1 power adapter

Front-side view:

1. Input select 1-5
2. Record select
3. Power LED
4. Headphone output
5. S-Video
6. Composite video
7. Audio input

Back-side view:

1. SCART input 1-4
2. SCART input 5 (+ record from channel 1-4)
3. SCART output
4. Audio output
5. Power adaptor input

Auto on/off.

The SVB7735 will always be in stand-by mode. It will switch on when detecting a signal from your equipment. When the SVB7735 detects no signal it will be switch off after 10 minutes.

Setup

1. Position the SVB7735 on a stable base in a horizontal or vertical position with the foot stands.
2. Connect up to 6 pieces of equipment, for example; DVD, VCR, Satellite receiver, Computer, game console, camcorder to the SVB7735. The equipment must be connected to the SVB7735 using a SCART cable.

* For input AV1 You can choose to connect 1 piece of equipment on the backside with a SCART cable or on the front side with either a S-Video or composite video cable and a 2RCA-2RCA audio cable. Input 5 is recommended for A/V equipment with record function like a VCR or DVD-Recordable.

Input AV1: SCART (or the S-Video/3RCA connection located on the front, please turn on only 1 piece of equipment at one time)

Input 2: SCART

Input 3: SCART

Input 5: SCART (also to record from AV1-AV4) recommended for VCR or DVD-recordable

3. Connect a SCART cable to the SVB7735 (TV out) and your TV

4. Use the 'audio out' to connect the SVB7735 to your stereo equipment so that you can enjoy sound from the selected equipment through your loudspeakers.

5. Plug the power adaptor into the SVB7735 and then into the mains.

The SVB7735 is ready for use

Usage

Automatic input select (standard)

1. Turn on Your TV.
2. Just turn on the A/V source, for example a DVD player. When you press 'play' the SVB7735 detects signal and switches automatically to the channel to which your DVD player is connected.

To watch a different A/V source, just turn on another source and the SVB7735 will switch automatically to the channel the source is connected to. For manual operation, just press on the channel button of the channel you want to select.

Recording

Make sure you have connected a piece of equipment that is able to record, for example a VCR or DVD recorder, to channel 5 of the SVB7735 (as channel 5 is the record channel)

1. Press the 'Record Select' button, which is positioned, on the front. The A/V LED on 'Record Select' will be blinking.

2. You can now select AV1-AV4 for recording. After selecting the LED will be on constantly on. The channel is now locked.

Now the SVB7735 is ready for recording

If you prefer to watch another channel than the channel which has been selected for recording, simply select any other channel to watch

To leave the 'Record mode' just press 'record select' again..

DE

SVB7735 Automatische Umschaltbox

Inhalt dieser Verpackung
 - 1 SVB7735 automatische Umschaltbox
 - 1 Netzteil

Vorderseite:

1. Eingangsauswahl 1-5

ES

SVB7735 Switchbox automática

Contenido de este embalaje
 - 1 SVB7735 switchbox automática
 - 1 adaptador de corriente

Parte frontal:

1. Selección de entrada 1-5
2. Pulsador de grabación
3. Testigo
4. Salida de auriculares
5. Entrada S-Video
6. Entrada video compuesto
7. Entrada audio

Parte trasera:

1. Entrada SCART 1-4
2. Entrada SCART 5 (también para la grabación de 1-4)
3. Salida SCART
4. Salida audio
5. Entrada de adaptador de corriente

Función de conexión/desconexión automática

El SVB7735 no tiene interruptor de conexión/desconexión. El SVB7735 se encuentra de forma estándar en modo de espera ('stand-by') y se conecta automáticamente cuando se detecta una señal de uno de los equipos acoplados. El SVB7735 se desconecta automáticamente cuando no se detecta ninguna señal durante 10 minutos.

Instalación y acoplamiento

1. Coloque el SVB7735 en un soporte estable, en posición horizontal o vertical por medio de los pies ajustables.
2. Coloque fino a 6 diversos apparejos audio/video, ad esempio: lector DVD, videoregistratore, receptor de satélite, computador, computador para giochi, videocamera. Gli apparecchi devono essere collegati al SVB7735 con una spina scart.

* Per la entrata 1 si può collegare un apparecchio sul retro, sull'ingresso SCART, o sul lato anteriore, con un cavo video S-Video o composto e un cavo audio 2RCA-2RCA. Per il collegamento di apparecchi con funzione di registrazione, ad esempio un videoregistratore o un registratore DV, si consiglia un ingresso 5.

Ingresso 1: SCART (e S-Video/3RCA sul lato anteriore, per un corretto funzionamento si può scegliere solamente 1 dei due ingressi)

1. Ingresso 2: SCART
2. Ingresso 3: SCART
3. Ingresso 4: SCART
4. Ingresso 5: SCART (anche per la registrazione dall'ingresso 1-4), consigliato per videoregistratore o registratore DVD

Entrada 1: SCART (y S-Video/3RCA en la parte frontal, para un funcionamiento correcto sólo se puede conectar 1 de los 2 equipos)

1. Entrada 2: SCART
2. Entrada 3: SCART
3. Entrada 4: SCART
4. Entrada 5: SCART (también para grabaciones de la entrada 1-4) recomendado para grabador de video o DVD

3. Coloque un cable SCART entre el SVB7735 (TV out) y su televisión.

4. Utilice la salida 'audio out' para poder escuchar el sonido del equipo seleccionado en el SVB7735, a través de su equipo estéreo/home cinema.

5. Enchufe el adaptador de corriente en el SVB7735 y en la toma de corriente.

El SVB7735 está listo para ser utilizado

Uso

1. Conecte la televisión
2. Conecte un equipo, por ejemplo el equipo de video. El SVB detecta la señal y selecciona automáticamente la entrada correspondiente

6. Pulse el botón 'record select' en la parte frontal del SVB7735.

1. Utilizar la opción 'audio out' (audio spento) para escuchar el audio del aparato seleccionado en el SVB7735 a través del sistema estéreo/home cinema.
2. Colgar el adaptador de corriente en el SVB7735 y en la toma de corriente.

II SVB7735 è ora pronto per l'uso.
