Detailed assembly instructions for the LEGO M38 - B0301 truck. The instructions are organized into 28 numbered steps, each showing a perspective view of the truck's chassis with specific parts highlighted in blue boxes. Each step includes a list of required parts in a yellow box above the diagram, with quantities indicated by 'X' followed by the quantity (e.g., X1, X2, X3, X4, X6). The parts are color-coded: black, grey, white, and tan. The assembly process starts with the base chassis and progresses through the addition of structural beams, side panels, and mechanical components like axles and wheels. The final step (28) shows the truck with all wheels and a tan front bumper attached.
