Attached to help

The IB-HUB1411-U3 is specially adapted to compete in industrial environments. The high-grade aluminium housing can withstand a lot and ensures effective heat dissipation. Thanks to the mounting brackets, it can be mounted and used almost everywhere. In addition to the four USB 3.0 ports, it offers one fast charge port and one QC 3.0 charging port. These ports are available even if the IB-HUB1703-U3 is not connected to a hostcomputer. The hub can be switched off if desired.

4 port USB 3.0 Hub with 2 charging ports

Charging

The QC 3.0 charge port with up to 12 V offers an extremely fast and convenient way to charge compatible smartphones, tablets, digital cameras and power banks. The fast-charge port (5 V / 2.4 A) complies with the new battery charging specification (BC 1.2) and completes the portfolio of ports. Thanks to the power supply unit, this is also possible without a connected host computer. The hub can be switched off via button.

Fourfold

Four USB 3.0 ports in one sweep. If all USB 3.0 ports are busy again, the phone needs to be charged and important data must be copied spontaneously back and forth from external storage devices, this candidate can help.

Mounted

Every working environment is different. The IB-HUB1411-QC3 faces this challenge and offers all features to compete in both private and industrial environments. Thanks to the table or wall mounting bracket, the high-grade aluminium housing can be installed stably.
