➤ Application Download & Connect Frame

- Power the internet photo frame with the included power adapter

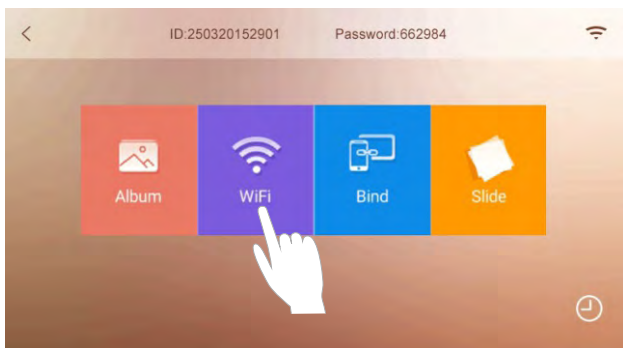

- Scan the QR code with your mobile device and install the app

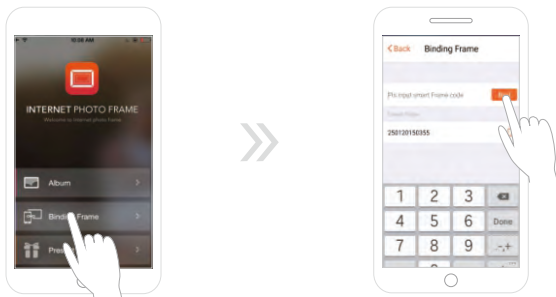

➤ Connect the internet photo frame to WIFI

- Select the correct WIFI network and enter the password

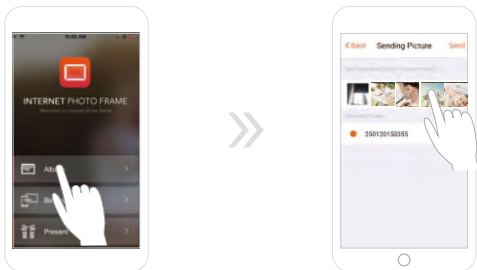

➤ Connect the mobile device to the frame

- Open the installed application on your mobile device
- Select "Bind Frame"
- Type in the unique frame code and password
- A mobile device can connect with multiple frames and vice versa

➤ Internet Photo Frame is ready to receive pictures

- In the application on your mobile device select "Album"
- Press "+" to select pictures from the gallery on your mobile device (max. 9 per session)
- Depending on the internet connection of the mobile device more or less pictures can be sent in one session

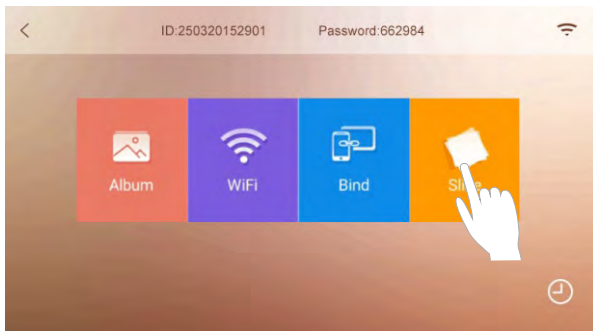

➤ Slide

- Select how you want the slide show to run, by looking at the examples

➤ Clock

- Press the clock to open the menu
- Select the hours during which the frame should be switched off

Specifications

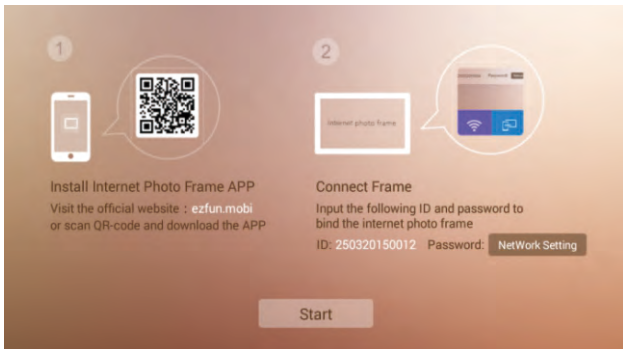

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802.11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

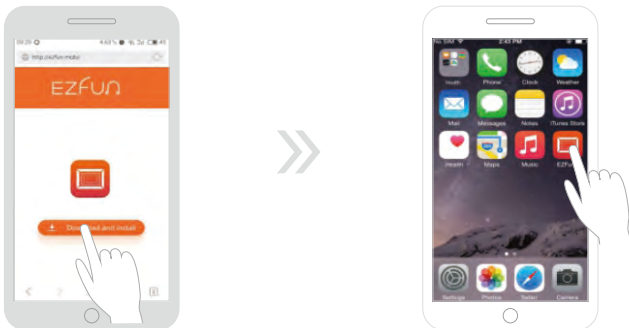

- Connected to the internet via Wi-Fi wireless technology to upload pictures from anywhere in the world
- Bright HD LCD display for consistently sharp pictures
- Intuitive touch screen for easy navigating through the menu
- 4 GB memory to store up to thousands of pictures (depending on size)
- Detachable kickstand and hanging hole; display automatically adjusts to landscape/portrait
- Protected against hacking
- Set-up in 3 simple steps; download the app via the on-screen QR code

➤ Anwendungsdownload & Verbinden des Rahmens

- Schließen Sie den Internet-Fotorahmen mit dem mitgelieferten Adapter an den Strom an

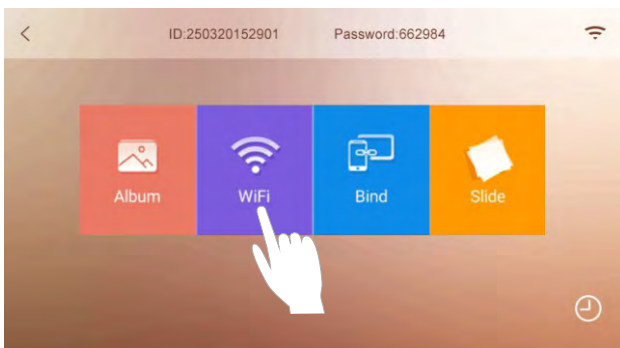

- Scannen Sie den QR-Code mit Ihrem Mobilgerät und installieren Sie die App

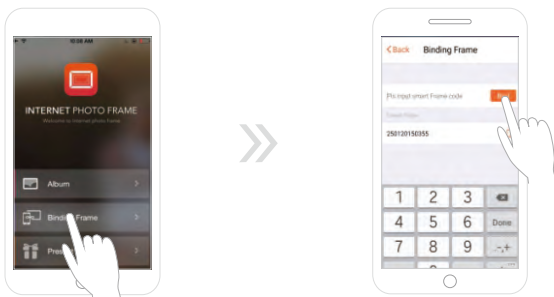

➤ Verbinden Sie den Internet-Fotorahmen mit dem WLAN

- Wählen Sie das richtige WLAN-Netzwerk aus und geben Sie das Passwort ein

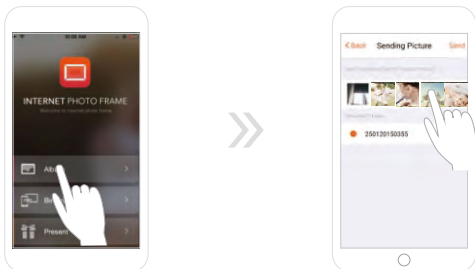

➤ Verbinden Sie das Mobilgerät mit dem Rahmen

- Öffnen Sie die installierte Anwendung auf Ihrem Mobilgerät
- Wählen Sie "Mit Rahmen verbinden"
- Geben Sie den eindeutigen Rahmencode und das Passwort ein
- Ein Mobilgerät kann mit mehreren Rahmen verbunden werden und umgekehrt

➤ Der Internet-Fotorahmen kann nun Bilder empfangen

- Wählen Sie in der Anwendung auf Ihrem Mobilgerät Album“ aus
- Drücken Sie “+“, um Bilder aus der Galerie auf Ihrem Mobilgerät auszuwählen (max. 9 pro Vorgang)
- Je nach Internetverbindung des Mobilgeräts können mehrere oder weniger Bilder pro Vorgang gesendet werden

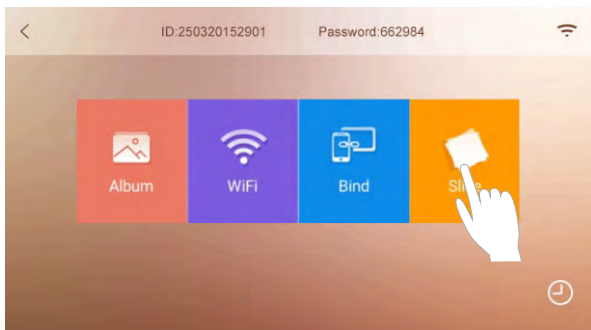

➤ Slide-Show

- Wählen Sie aus den Beispielen, wie die Slide-Show abgespielt werden soll

➤ Uhr

- Drücken Sie auf die Uhr, um das Menü zu öffnen
- Wählen Sie die Stunden, in denen der Rahmen ausgeschaltet werden soll

➤ Specifications

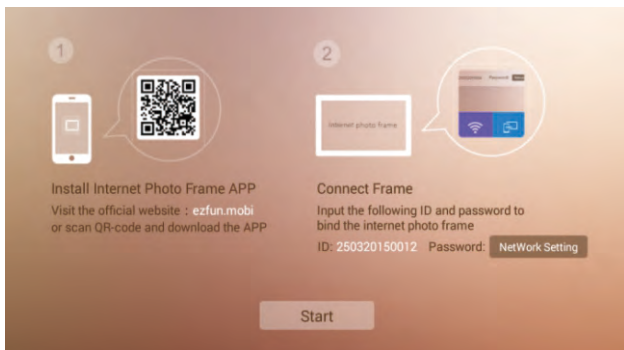

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

➤ USP's

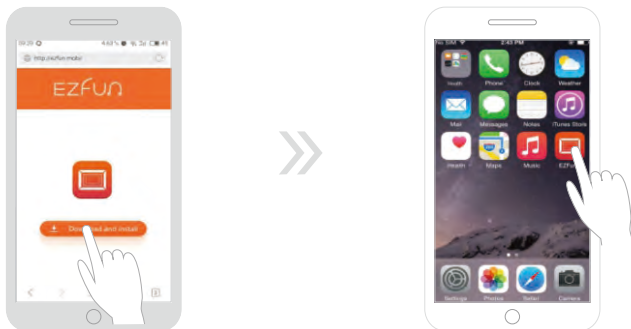

- Über WLAN-Drahtlostechnologie mit dem Internet verbunden, um Bilder von überall in der Welt hochzuladen
- Helle HD-LCD-Anzeige für konstant scharfe Bilder
- Intuitiver Touchscreen für einfaches Navigieren durch das Menü
- 4-GB-Speicher zum Speichern von Tausenden von Bildern (je nach Größe)
- Abnehmbarer Ständer und Aufhängeöse; Anzeige passt sich automatisch an Quer-/Hochformat an
- Hacking-Schutz
- Einrichtung in 3 einfachen Schritten; laden Sie die App über den QR-Code auf dem Bildschirm herunter

➤ Download app og tilslut ramme

- Sæt strøm til internet-billedrammen med den medfølgende strømadapter

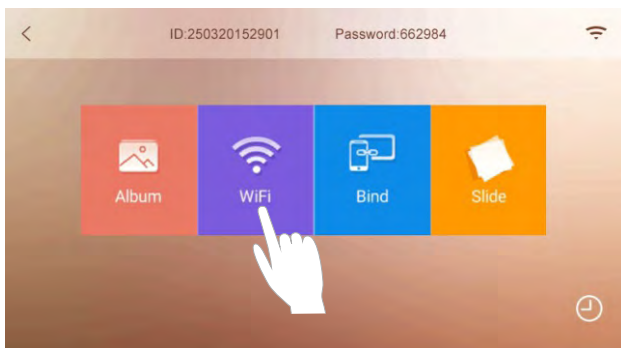

- Scan QR-koden med din mobile enhed, og installér appen

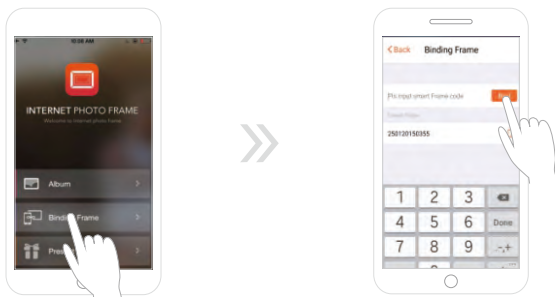

➤ Slut billedrammen til Wi-Fi

- Vælg det korrkte Wi-Fi-netværk, og indtast adgangskoden

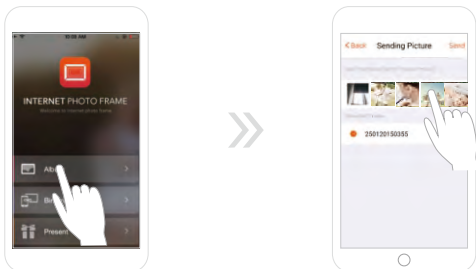

➤ Slut den mobile enhed til rammen

- Åbn den installerede app på din mobile enhed
- Vælg "Find ramme"
- Indtast unik kode og adgangskode for rammen
- En mobil enhed kan forbindes med flere rammer og omvendt

➤ Internet-billedrammen er klar til at modtage billeder

- Vælg "Album" i appen på din mobile enhed
- Tryk på "+" for at vælge billeder fra galleriet på din mobile enhed (maks. 9 pr. session)
- Afhængigt af den mobile enheds internetforbindelse kan der sendes flere eller færre billeder i en session

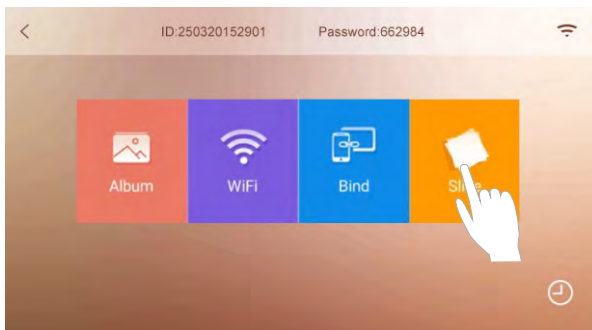

➤ Slide

- Vælg, hvordan slideshowet skal køre ved at kigge på eksemplerne

➤ Ur

- Tryk på uret for at åbne menuen
- Vælg de tidspunkter, hvor rammen skal være slukket

Specifications

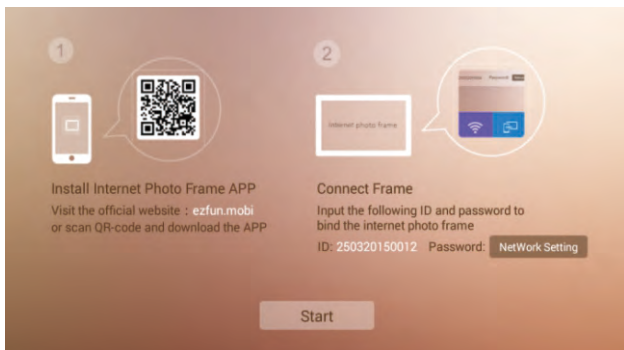

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

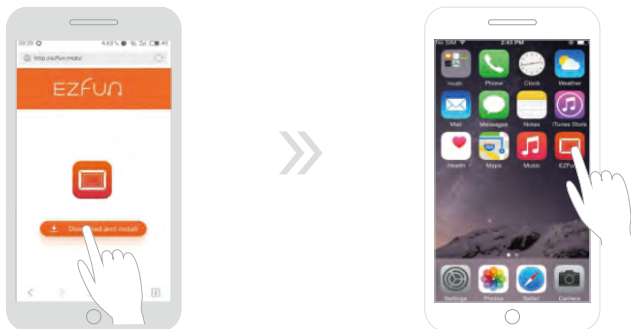

- Sluttet til internettet via trådløs Wi-Fi-teknologi, så du kan overføre billeder, uanset hvor du befinder dig i verden
- Kraftigt HD LCD-display sikrer skarpe billeder altid
- Intuitiv berøringsskærm sikrer nem navigation i menuen
- 4 GB hukommelse til lagring af tusindvis af billeder (afhængigt af deres størrelse)
- Aftageligt støtteben og ophængningshul. Skærmen justerer sig automatisk til vandret/lodret visning
- Beskyttet mod hacking
- Opsætning i 3 enkle trin: Download appen via QR-koden på skærmen

➤ Stažení Aplikace a Připojení Rámečku

- Napájejte internetový fotorámeček s dodaným adaptérem

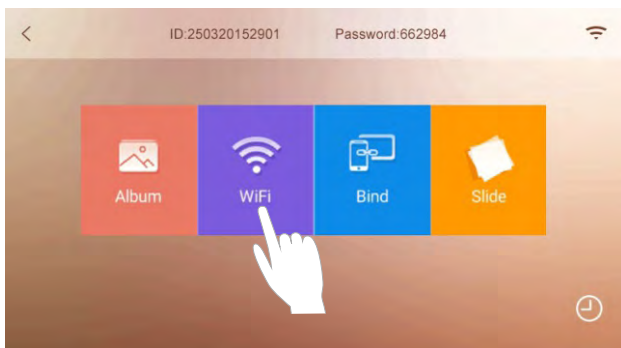

- Mobilním zařízením naskenujte QR kód a nainstalujte aplikaci

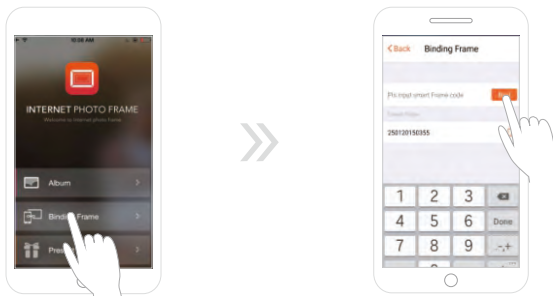

➤ Připojte internetový fotorámeček k Wi-Fi

- Zvolte správnou síť Wi-Fi a zadejte heslo

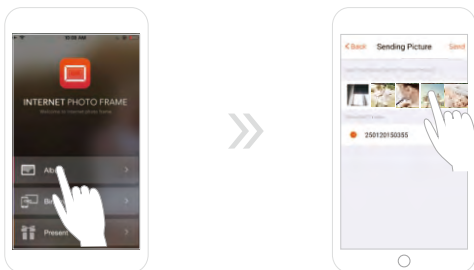

➤ Připojte k fotorámečku mobilní zařízení

- Spustíte nainstalovanou aplikaci na svém mobilním zařízení
- Zvolíte možnost „Bind Frame“
- Zadejte speciální kód rámečku a heslo
- Mobilní zařízení lze připojit k více rámečkům a naopak

➤ Internetový fotorámeček je nyní připravený na Vaše obrázky

- V aplikaci na svém mobilním zařízení zvolte možnost „Album“
- Stiskněte tlačítko „+“ a vyberte obrázky z galerie na svém mobilním zařízení (maximálně 9 během relace)
- Možnost odeslat v jedné relaci více či méně obrázků závisí na internetovém připojení Vašeho mobilního zařízení.

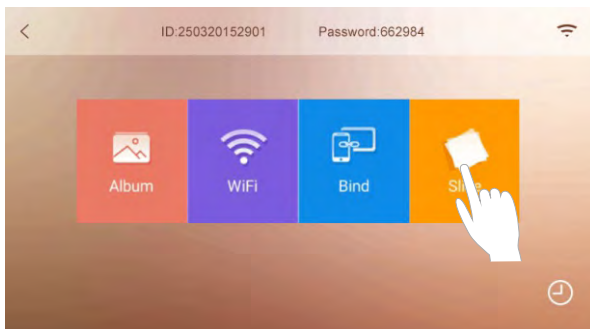

➤ Prezentace

- Podívejte se na příklady a vyberte, jak má vypadat Vaše prezentace

➤ Hodiny

- Stiskněte tlačítko hodin a vstupte do nabídky
- Vyberte hodiny, při kterých bude rámeček vypnutý

Specifications

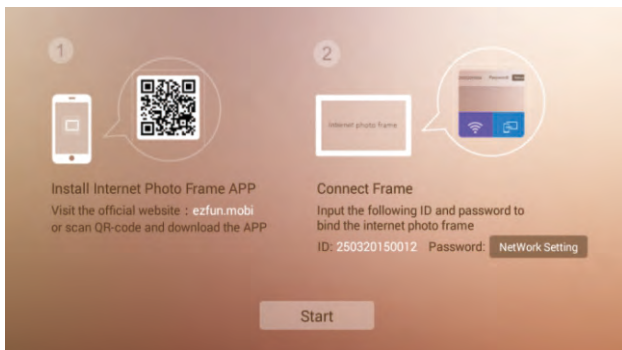

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

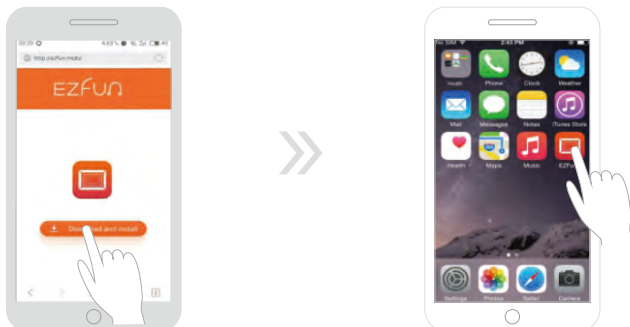

- Díky připojení k internetu prostřednictvím bezdrátové technologie Wi-Fi můžete nahrávat fotografie odkudkoli na světě
- Jasný HD LCD displej zaručuje stále ostré snímky
- Intuitivní dotyková obrazovka poskytuje snadnou navigaci nabídkou
- 4 GB paměti umožňují uložit tisíce fotografií (v závislosti na velikosti)
- Odnímatelný stojan a otvor pro zavěšení; displej se automaticky přizpůsobí zobrazení na výšku nebo na šířku
- Ochrana proti napadnutí
- Nastavení ve 3 snadných krocích; stažení aplikace prostřednictvím QR kódu na displeji

➤ Sovelluksen lataus ja kehiksen yhdistäminen

- Yhdistä internet-valokuvakehys virtalähteeseen mukana toimitetulla virtasovittimella

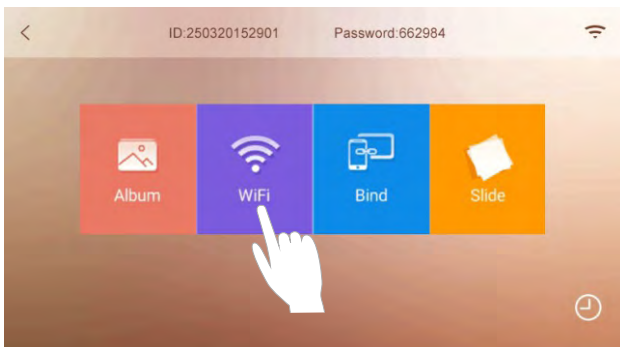

- Skannaa QR-koodi mobiililaitteellasi ja asenna sovellus

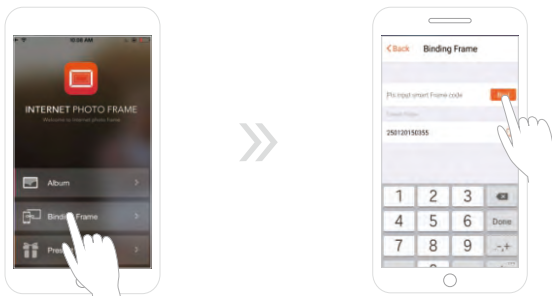

➤ Yhdistä internet-valokuvakehys Wi-Fi-verkkoon

- Valitse oikea Wi-Fi-verkko ja anna salasana

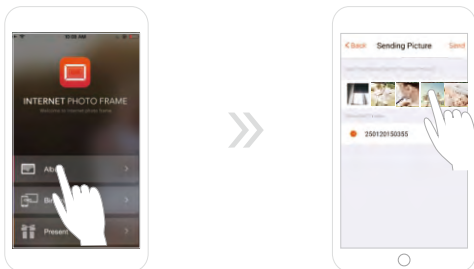

➤ Liitä mobiililaitte kehykseen

- Avaa asentamasi sovellus mobiililaitteellasi
- Valitse "Bind Frame" (Liitä kehys)
- Syötä kehyksen koodi ja salasana
- Mobiililaitteen voi yhdistää useisiin kehyksiin ja kehyksen useisiin mobiililaitteisiin

➤ Internet-valokuvakehys on valmiina vastaanottamaan kuvia

- Valitse mobiililaitesovelluksessa kohta "Album" (Albumi)
- Paina "+" ja valitse kuvat mobiililaitteen galleriasta (enintään 9 kerrallaan)
- Kuvia voidaan lähettää kerralla enemmän tai vähemmän mobiililaitteen verkkoyhteydestä riippuen

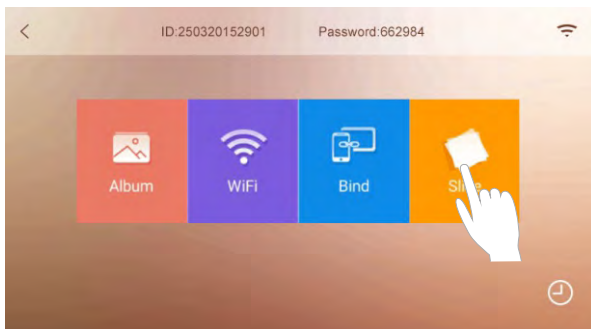

➤ Dia

- Valitse esimerkeistä haluamasi diaesitys

➤ Kello

- Avaa valikko painamalla kelloa
- Määritä, milloin kehys on sammutettuna

Specifications

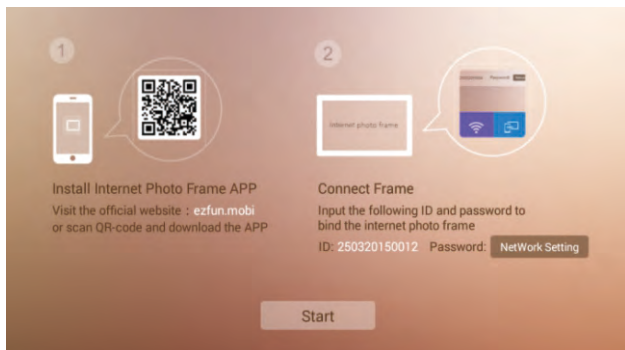

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

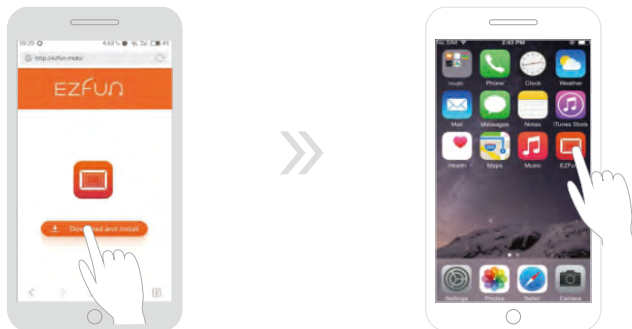

- Internet-yhteys langattomalla Wi-Fi-tekniikalla mahdollistaa kuvien jakamisen kaikkialta maailmasta
- Kirkas HD LCD -näyttö takaa aina terävät kuvat
- Intuiitiivinen kosketusnäyttö tekee valikon käyttämisestä helppoa
- 4 Gt:n muistiin mahtuu jopa tuhansia kuvia (kuvien koosta riippuen)
- Irrotettava jalkatuki ja ripustusreikä – näyttö mukautuu automaattisesti pysty- ja vaakasuuntaan
- Tietomurtosuojattu
- Asennus 3 helppossa vaiheessa – lataa sovellus näytöllä olevan QR-koodin avulla

➤ Descarga de la aplicación y conexión del marco

- Suministre alimentación al marco de fotos con conexión a Internet mediante el adaptador de alimentación incluido

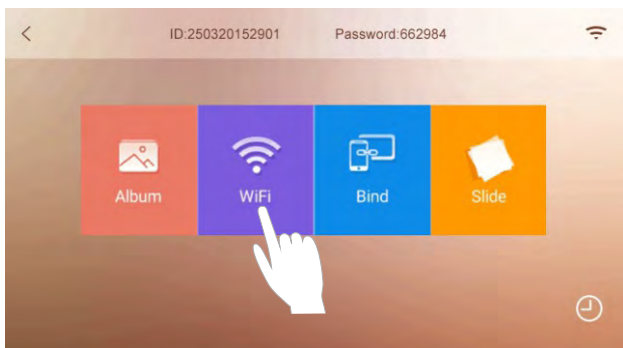

- Escanee el código QR con su dispositivo móvil e instale la aplicación

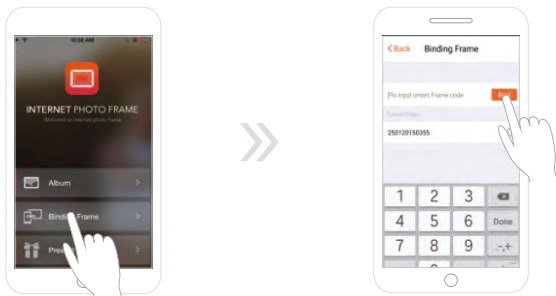

➤ Conecte el marco de fotos con conexión a Internet a la red Wi-Fi

- Seleccione la red Wi-Fi correcta e introduzca la contraseña

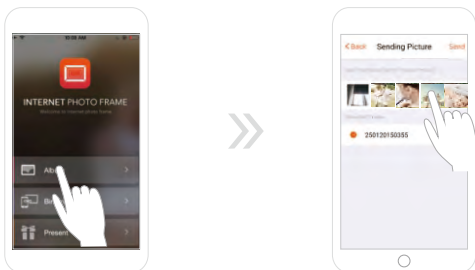

➤ Conecte el dispositivo móvil al marco

- Abra la aplicación instalada en el dispositivo móvil
- Seleccione "Bind Frame" (Vincular marco)
- Escriba el código de marco único y la contraseña
- Un dispositivo móvil puede conectarse con varios marcos y viceversa

➤ El marco de fotos con conexión a Internet está listo para recibir imágenes

- En la aplicación del dispositivo móvil, seleccione "Album" (Álbum)
- Pulse "+" para seleccionar imágenes de la galería de su dispositivo móvil (un máximo de 9 por sesión)
- En función de la conexión a Internet del dispositivo móvil, se podrán enviar más o menos imágenes en una sola sesión

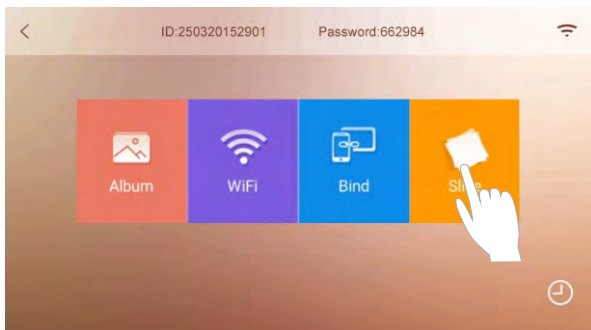

➤ Presentación de diapositivas

- Seleccione cómo desea que se ejecute la presentación. Para ello, observe los ejemplos

➤ Reloj

- Pulse el reloj para abrir el menú
- Seleccione las horas durante las que el marco debe estar apagado

Specifications

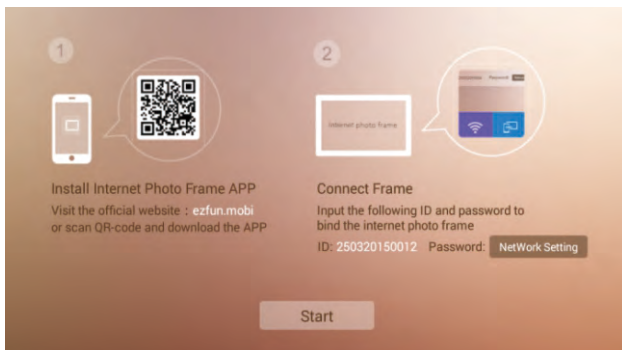

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

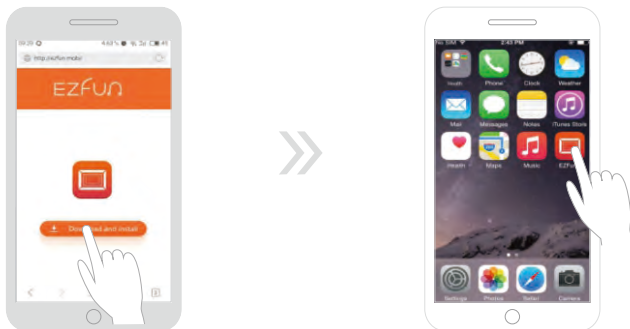

- Conexión inalámbrica a Internet mediante tecnología Wi-Fi para cargar fotos desde cualquier parte del mundo.
- Pantalla LCD HD brillante que ofrece imágenes nítidas.
- Pantalla táctil intuitiva que facilita la navegación por el menú.
- 4 GB de memoria para guardar miles de imágenes (dependiendo del tamaño).
- Pie de apoyo extraíble y orificio para colgar; pantalla que ajusta automáticamente la orientación horizontal/vertical.
- Protección contra piratería informática.
- Configuración en 3 sencillos pasos; descarga de la aplicación a través del código QR en pantalla.

➤ Λήψη εφαρμογής και σύνδεση κορνίζας

- Τροφοδοτήστε την κορνίζα internet με το παρεχόμενο τροφοδοτικό ρεύματος

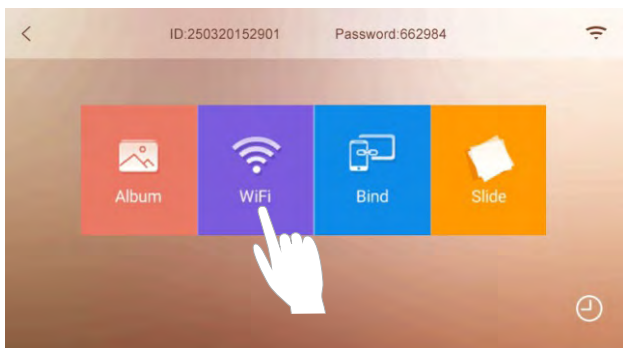

- Σαρώστε τον κωδικό QR με την κινητή σας συσκευή και εγκαταστήστε την εφαρμογή

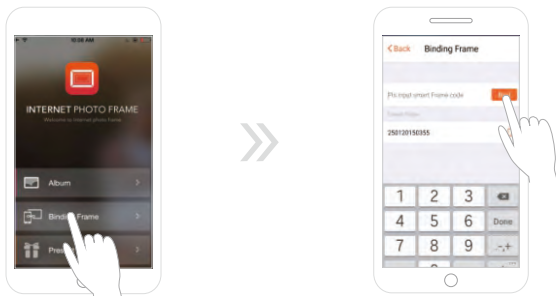

➤ Συνδέστε την κορνίζα internet σε Wi-Fi

- Επιλέξτε το σωστό δίκτυο Wi-Fi και εισαγάγετε τον κωδικό πρόσβασης

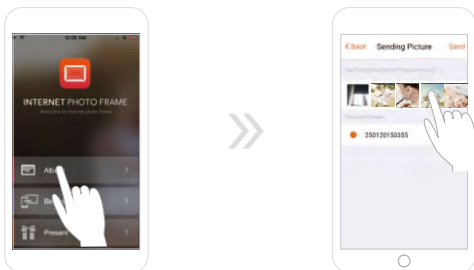

➤ Συνδέστε την κινητή συσκευή στην κορνίζα

- Ανοίξε την εγκατεστημένη εφαρμογή στην κινητή σας συσκευή
- Επιλέξτε "Bind Frame" (Σύζευξη κορνίζας)
- Πληκτρολογήστε τον μοναδικό κωδικό κορνίζας και τον κωδικό πρόσβασης
- Μια κινητή συσκευή μπορεί να συνδεθεί με πολλές κορνίζες και το αντίστροφο

➤ Η κορνίζα Internet είναι έτοιμη να δεχτεί εικόνες

- Στην εφαρμογή της κινητής συσκευής σας, επιλέξτε "Album" (Άλμπουμ)
- Πατήστε "+" για να επιλέξετε εικόνες από τη συλλογή στην κινητή σας συσκευή (μέγ. 9 ανά περίοδο σύνδεσης)
- Ανάλογα με τη σύνδεση internet της κινητής συσκευής, ποικίλει ο αριθμός των εικόνων που μπορούν να σταλούν σε μια περίοδο σύνδεσης

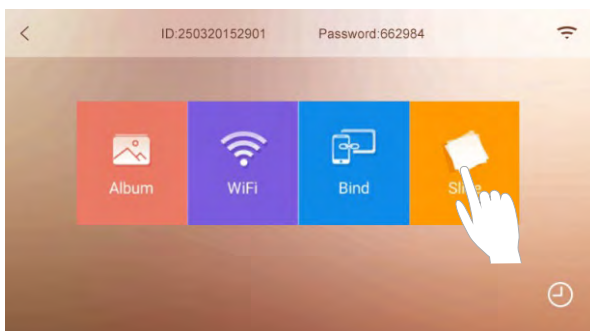

➤ Παρουσίαση

- Επιλέξτε πώς θέλετε να γίνει η παρουσίαση, μελετώντας τα παραδείγματα

➤ Ρολόι

- Πατήστε το ρολόι για να ανοίξετε το μενού
- Επιλέξτε τις ώρες κατά τις οποίες η κορνίζα πρέπει να απενεργοποιηθεί

Specifications

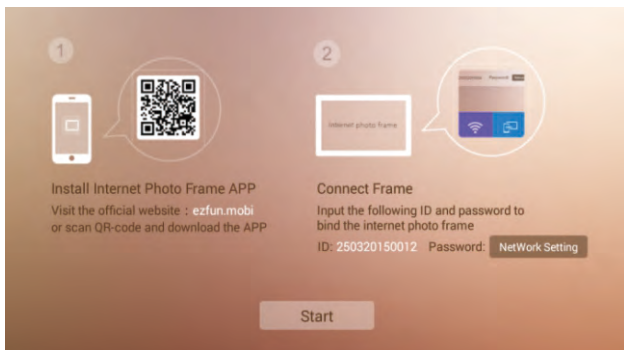

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802.11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

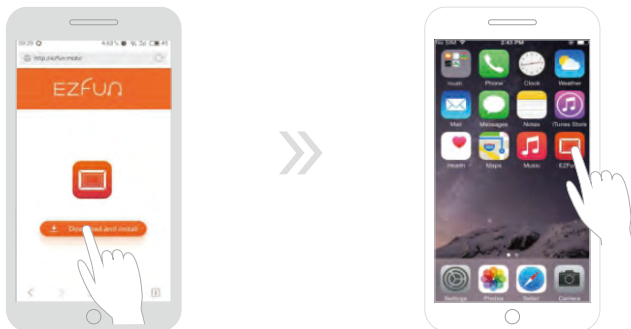

- Connected to the internet via Wi-Fi wireless technology to upload pictures from anywhere in the world
- Bright HD LCD display for consistently sharp pictures
- Intuitive touch screen for easy navigating through the menu
- 4 GB memory to store up to thousands of pictures (depending on size)
- Detachable kickstand and hanging hole; display automatically adjusts to landscape/portrait
- Protected against hacking
- Set-up in 3 simple steps; download the app via the on-screen QR code

➤ Alkalmazásletöltés és a keret csatlakoztatása

- A mellékelt hálózati adapterrel tölts fel internetes képkeretét

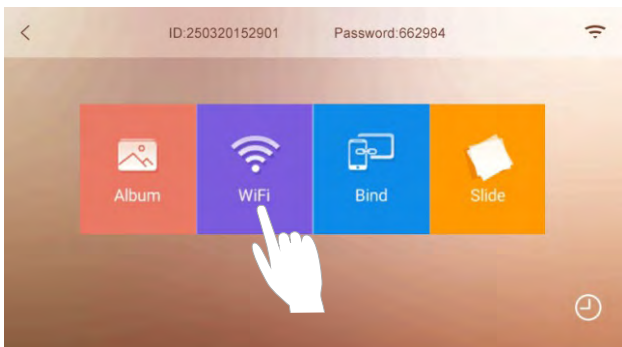

- Mobilkészközével olvassa be a QR-kódot és telepítse az alkalmazást

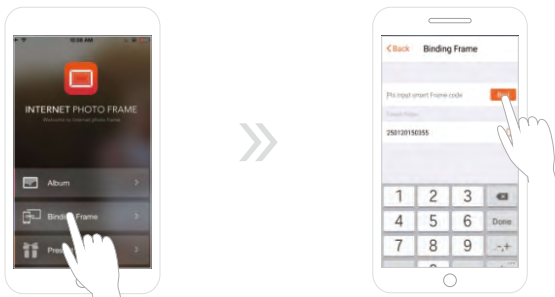

➤ Csatlakoztassa az internetes képkeretet Wi-Fi hálózathoz

- Válassza ki a megfelelő Wi-Fi hálózatot és írja be a jelszót

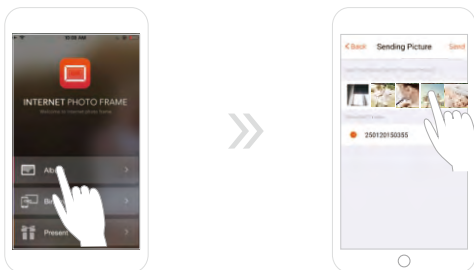

➤ Csatlakoztassa a mobileszközt a kerethez

- Nyissa meg a letöltött alkalmazást a mobileszközén
- Válassza a „Bind Frame” (Keret csatlakoztatása) lehetőséget
- Írja be az egyedi keretkódot és a jelszót
- Egy mobileszköz több kerethez tud csatlakozni és fordítva

➤ Az Internetes Képkeret készen áll képek fogadására

- A mobil eszközén lévő alkalmazásban válassza az „Album” lehetőséget
- Nyomja meg a „+” jelet képek kiválasztásához a mobil eszköz galériájából (alkalmanként maximum 9)
- A mobil eszköz internetkapcsolatától függően egy alkalommal több vagy kevesebb kép küldhető

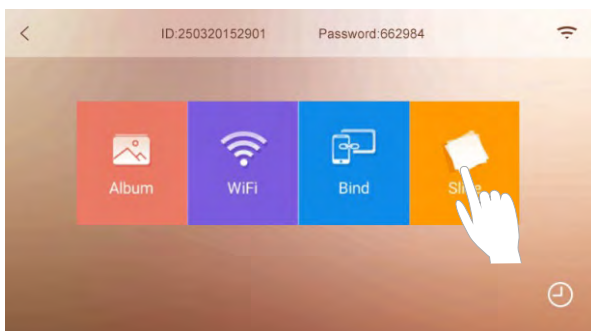

➤ Diavetítés

- A példák alapján válassza ki, hogyan fusson a diavetítés

➤ Óra

- Az óra megnyomásával nyissa meg a menüt
- Válassza ki azokat az órákat, amelyek során a képkeret kikapcsoljon

Specifications

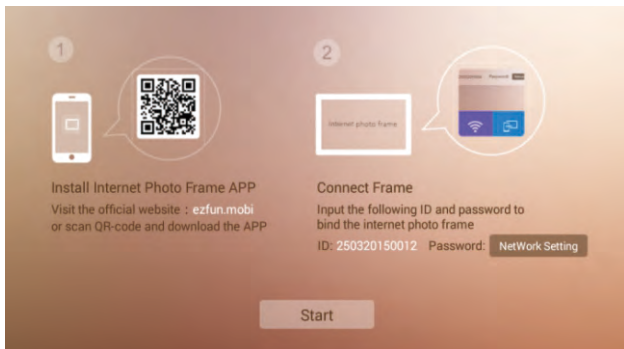

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n)**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

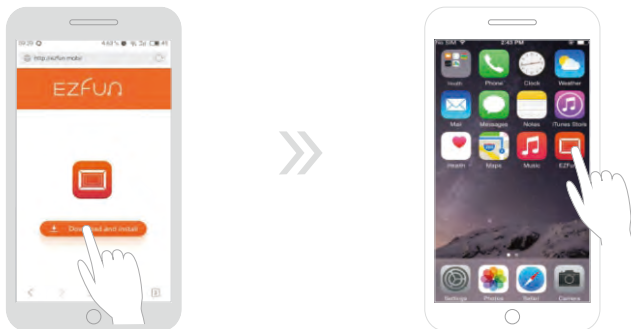

- Wi-Fi vezeték nélküli technológiával csatlakozik az internetre, így a világ bármely pontjáról tölthet fel képeket
- Fényes HD LDC-kijelző a mindig éles képekért
- Intuitív érintőképernyő az egyszerű navigálásért a menüben
- 4 GB memória több ezer kép tárolásához (méret függvényében)
- Lecsatolható állvánnyal és akasztólyukkal; a kijelző automatikusan átáll tájkép/portré jellegű képekhez
- Hekkerbiztos
- 3 egyszerű lépésben beüzemelheti; töltsse le az alkalmazást a képernyőn látható QR-kóddal

➤ Téléchargement de l'application et branchement du cadre

- Branchez le cadre photo Internet à l'aide de l'adaptateur secteur fourni

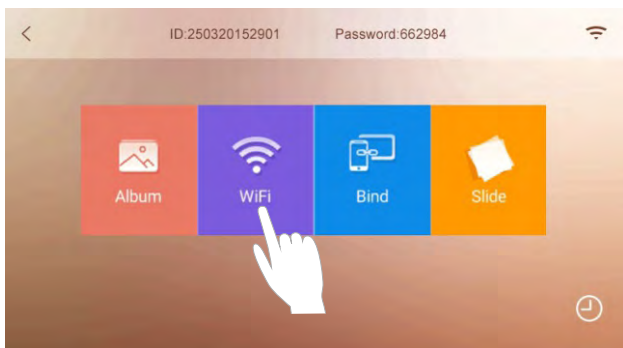

- Scannez le code QR à l'aide de votre appareil mobile, puis installez l'application

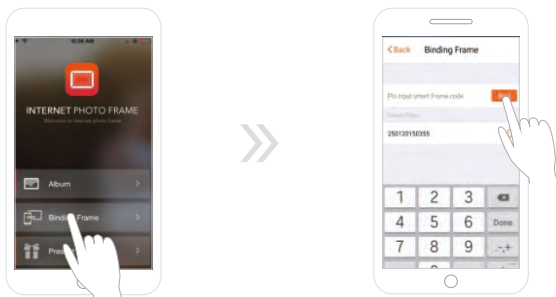

➤ Connectez le cadre photo Internet au Wi-Fi

- Sélectionnez le réseau Wi-Fi approprié, puis saisissez le mot de passe

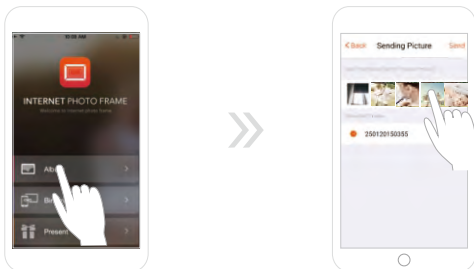

➤ Connectez l'appareil mobile au cadre

- Ouvrez l'application installée sur votre appareil mobile
- Sélectionnez « Bind Frame » (Relier le cadre)
- Saisissez le code et le mot de passe uniques du cadre
- Un appareil mobile peut être connecté à plusieurs cadres et vice versa

➤ Le cadre photo Internet est prêt à recevoir des images

- Dans l'application installée sur votre appareil mobile, sélectionnez « Album »
- Appuyez sur « + » pour sélectionner des photos de la bibliothèque sur votre appareil mobile (9 photos maximum par session)
- En fonction de la qualité de la connexion Internet du périphérique mobile, un nombre plus ou moins important de photos peuvent être envoyées lors d'une session

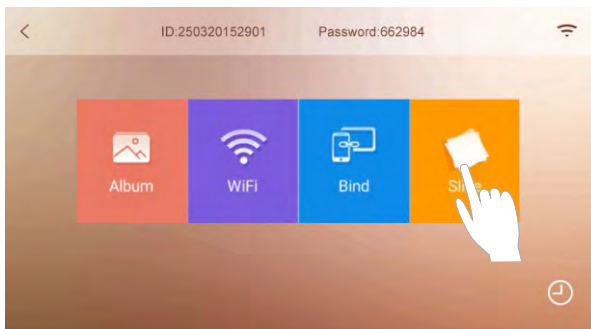

➤ Diaporama

- Sélectionnez la façon dont vous voulez que le diaporama s'exécute. Pour ce faire, regardez les différents exemples

➤ Horloge

- Appuyez sur l'horloge pour ouvrir le menu
- Sélectionnez les heures durant lesquelles le cadre doit être désactivé

Specifications

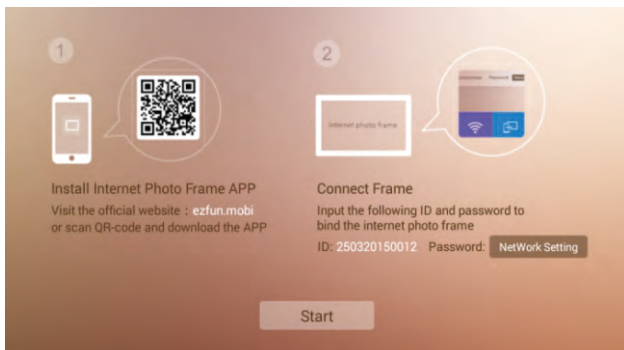

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n)**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

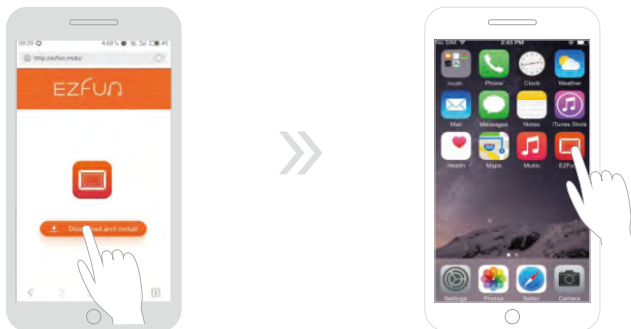

- Connecté à Internet via la technologie sans fil Wi-Fi pour télécharger des photos où que vous soyez dans le monde
- Affichage LCD HD lumineux pour des images toujours nettes
- Écran tactile intuitif pour naviguer facilement dans le menu
- 4 Go de mémoire pour stocker jusqu'à des milliers de photos (selon leur taille)
- Béquille détachable et orifice de suspension ; l'affichage s'ajuste automatiquement en mode paysage/portrait
- Protégé contre le piratage
- Configuration en 3 étapes simples ; téléchargez l'application via le code QR à l'écran

➤ Toepassing downloaden en lijst aansluiten

- Sluit de internetfotolijst aan met de meegeleverde adapter

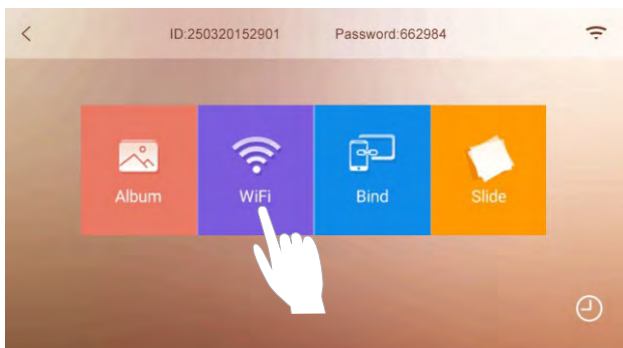

- Scan de QR-code met uw mobiele apparaat en installeer de app

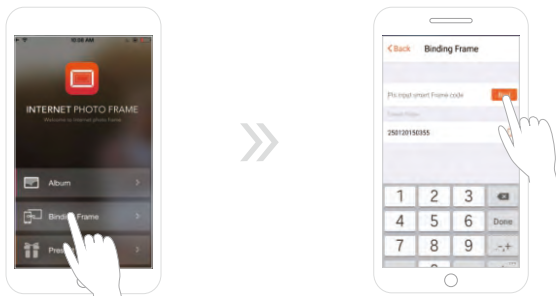

➤ Verbind de internetfotolijst met Wi-Fi

- Selecteer het juiste Wi-Fi-netwerk en voer het wachtwoord in

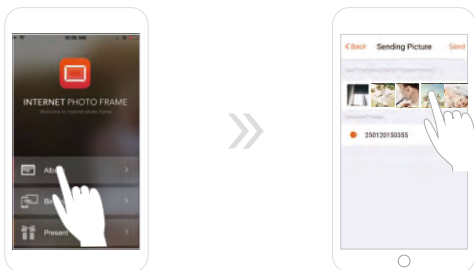

➤ Verbind het mobiele apparaat met de lijst

- Open de geïnstalleerde toepassing op uw mobiele apparaat
- Selecteer "Bind Frame" (lijst verbinden)
- Voer de unieke lijstcode en het wachtwoord in
- Een mobiel apparaat kan verbinding maken met meerdere lijsten en vice versa

➤ De internetfotolijst is klaar om foto's te ontvangen

- Selecteer "Album" in de toepassing op uw mobiele apparaat
- Druk op "+" om foto's uit de galerij op uw mobiele apparaat te selecteren (max. 9 per sessie)
- Afhankelijk van de internetverbinding van het mobiele apparaat kunnen er meer of minder foto's in één sessie worden verzonden

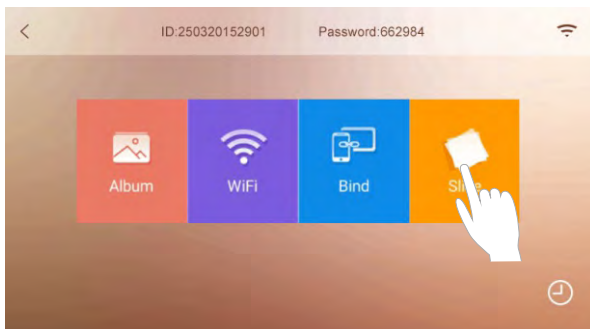

➤ Dia

- Selecteer hoe u de diaprojectie wilt uitvoeren, door te kijken naar de voorbeelden

➤ Klok

- Open het menu door de klok te drukken
- Selecteer de uren waarin de lijst moet worden uitgeschakeld

Specifications

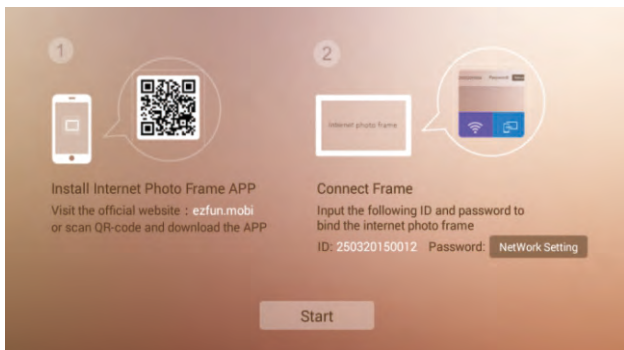

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n)**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

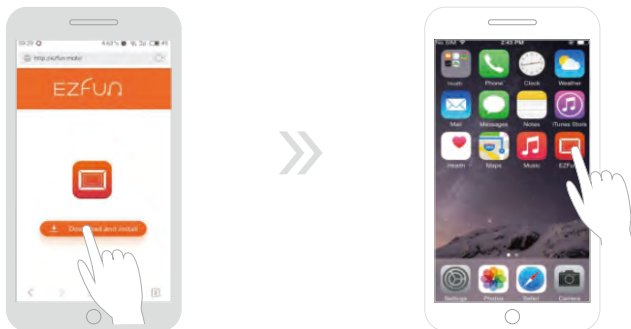

- Verbonden met internet via draadloze Wi-Fi-technologie om foto's te uploaden vanaf welke plek dan ook ter wereld
- Helder HD LCD-scherf voor consistente scherpe beelden
- Intuïtief aanraakscherf voor eenvoudig navigeren door het menu
- 4 GB geheugen om maar liefst duizenden foto's op te slaan (afhankelijk van de grootte)
- Afneembare standaard en ophanggat; het display wordt automatisch aangepast op liggende/staande weergave
- Beveiligd tegen hacking
- Set-up in 3 eenvoudige stappen; download de app via de on-screen QR-code

➤ Nedlasting av app og tilkobling av ramme

- Driv Internett-fotorammen med den medfølgende strømadapteren

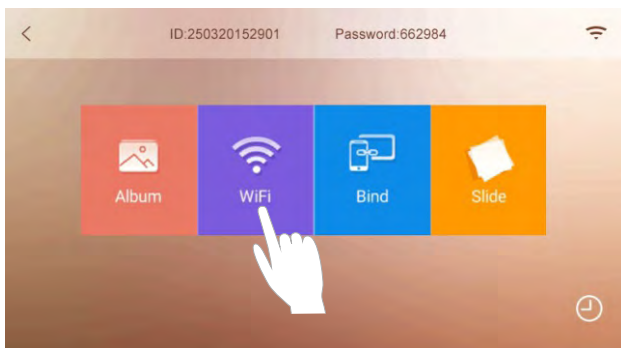

- Skann QR-koden med den mobile enheten din, og installer appen

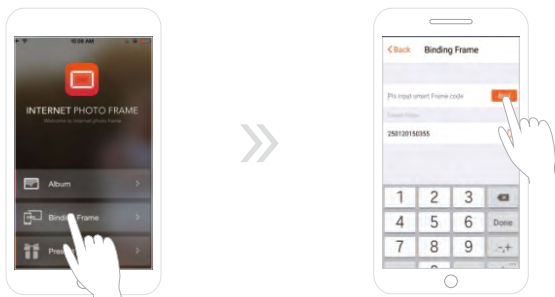

➤ Koble Internett-fotorammen til Wi-Fi

- Velg riktig Wi-Fi-nettverk, og angi passordet

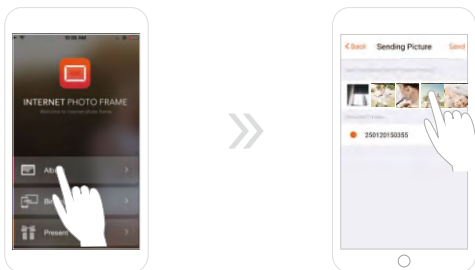

➤ Koble mobilenheten til rammen

- Åpne appen som er installert på den mobile enheten
- Velg «Bind Frame»
- Skriv inn den unike rammekoden og passordet
- En mobil enhet kan kobles til flere rammer og omvendt

➤ Internett-fotorammen er klar til å motta bilder

- I appen på den mobile enheten velger du «Album»
- Trykk på «+» for å velge bilder fra galleriet på den mobile enheten (maks. 9 per økt)
- Avhengig av Internett-tilkoblingen til den mobile enheten kan det sendes flere eller færre bilder i én økt

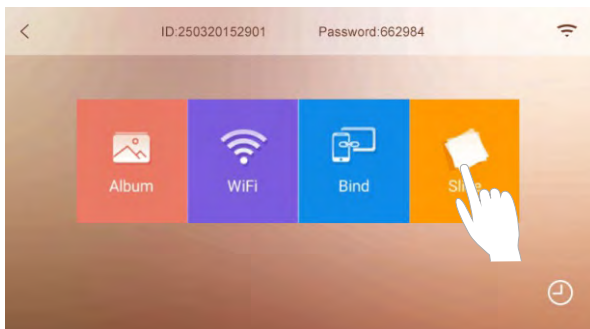

➤ Lysbilde

- Velg hvordan du vil at lysbildeframvisningen skal kjøres ved å se på eksemplene

➤ Klokke

- Trykk på klokken for å åpne menyen
- Velg timene når rammen skal være slått av

Specifications

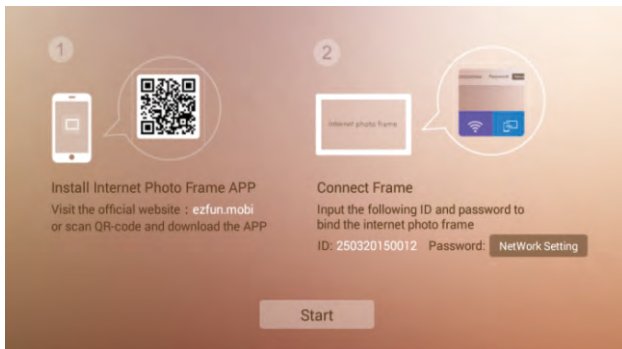

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

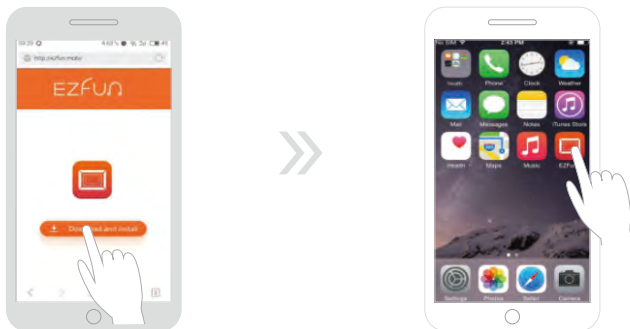

- Koblet til Internett via trådløs Wi-Fi-teknologi for å laste opp bilder fra hvorsomhelst i verden
- Klar HD-LCD-skjerm for konsekvent skarpe bilder
- Intuitiv berøringsskjerm for enkel navigering gjennom menyen
- 4 GB minne for å lagre opptil flere tusen bilder (avhengig av størrelse)
- Avtakbart stativ og hengehull; visningen tilpasser seg automatisk liggende/stående
- Beskyttet mot hacking
- Oppsett med tre enkle trinn; last ned appen via QR-koden på skjermen

➤ Download dell'applicazione e connessione della cornice

- Collegare la cornice fotografica con accesso a Internet all'alimentazione tramite l'adattatore di alimentazione incluso

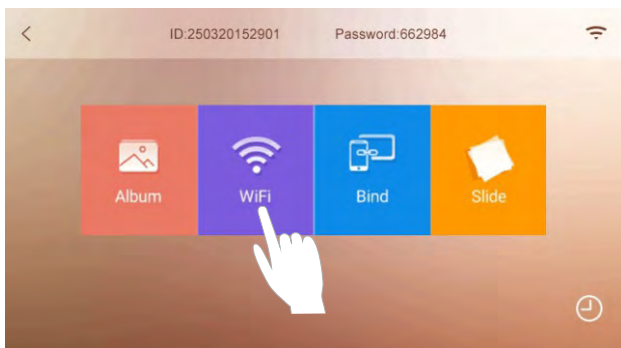

- Eseguire le scansione del codice QR con il dispositivo mobile e installare l'applicazione

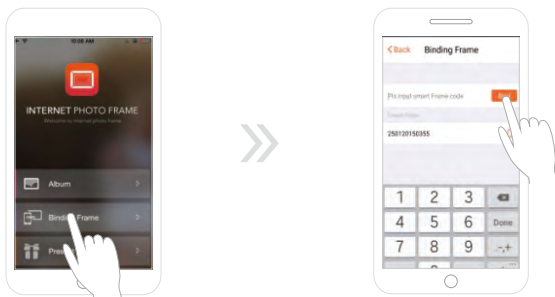

➤ Connettere la cornice fotografica alla rete Wi-Fi

- Selezionare la rete Wi-Fi corretta e inserire la password

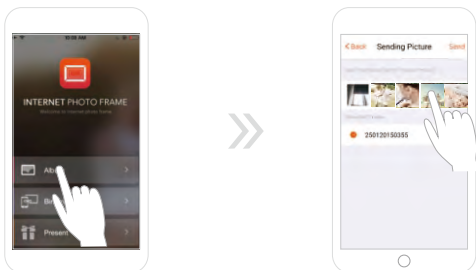

➤ Connettere il dispositivo mobile alla cornice

- Aprire l'applicazione installata sul dispositivo mobile
- Selezionare "Associa cornice"
- Digitare il codice e la password univoci della cornice
- È possibile collegare un dispositivo mobile a più cornici e viceversa

➤ La cornice fotografica con accesso a Internet è pronta a ricevere le foto

- Nell'applicazione sul dispositivo mobile, selezionare "Album"
- Premere "+" per selezionare le immagini dalla galleria sul dispositivo mobile (massimo 9 per sessione)
- In base alla connessione Internet del dispositivo mobile, è possibile inviare un numero maggiore o minore di foto per sessione

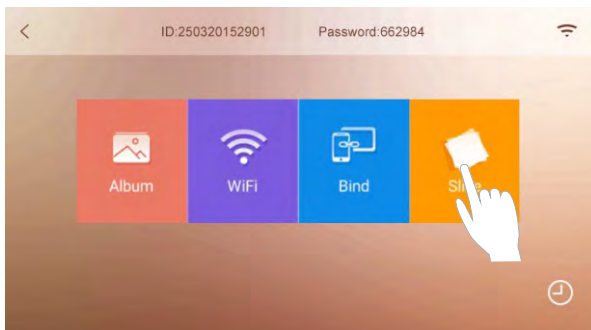

➤ Diapositive

- Osservando gli esempi, selezionare la modalità di scorrimento delle diapositive desiderata

➤ Orologio

- Premere l'orologio per aprire il menu
- Selezionare l'intervallo di ore in cui la cornice deve essere spenta

Specifications

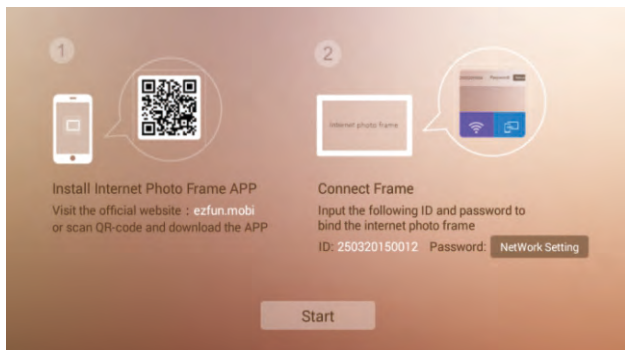

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802,11 b/g/n**
- Processor: **dual core cortex-A5**
- Internal memory: **512M DDR3, 4 GB Nand flash**
- **JPG, BMP, GIF, PNG pictures**
- Supported mobile devices: **Android™ and iOS**
- External memory: **SD/MMC card**
- External memory: **USB 2.0 port**
- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

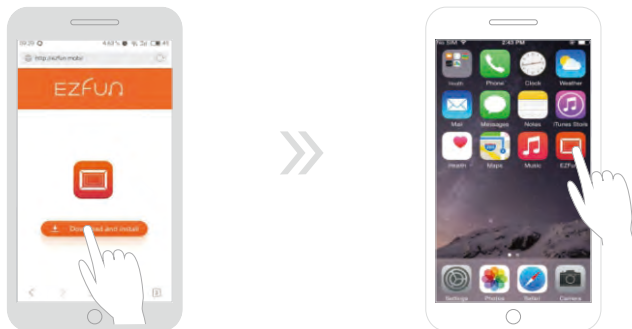

- Si collega a Internet tramite tecnologia di rete Wi-Fi per caricare le immagini da qualsiasi posizione
- Luminoso display LCD HD per immagini sempre nitide
- Touch screen intuitivo per una facile navigazione attraverso il menu
- 4 GB di memoria per memorizzare fino a migliaia di immagini (a seconda delle dimensioni)
- Supporto scollegabile e foro di fissaggio a parete, il display si regola automaticamente in modalità orizzontale/verticale
- Protezione da attacchi hacker
- Configurabile in 3 semplici passaggi, l'app è scaricabile tramite codice QR su schermo

➤ Pobieranie aplikacji i podłączanie ramki

- Podłączaj znajdujący się zasilacz do sieci i do cyfrowej ramki do zdjęć

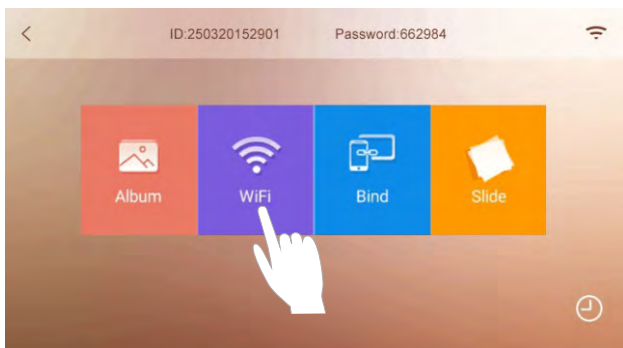

- Zeskanuj kod QR za pomocą urządzenia mobilnego i zainstaluj aplikację

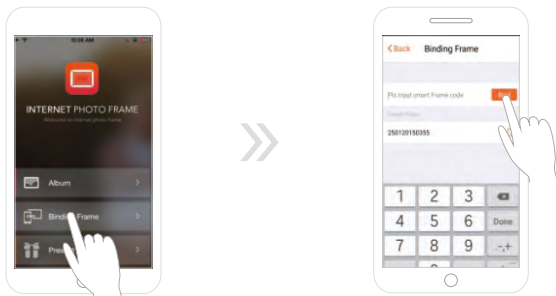

➤ Podłącz cyfrową ramkę do zdjęć do sieci Wi-Fi

- Wybierz właściwą sieć Wi-Fi i wpisz hasło

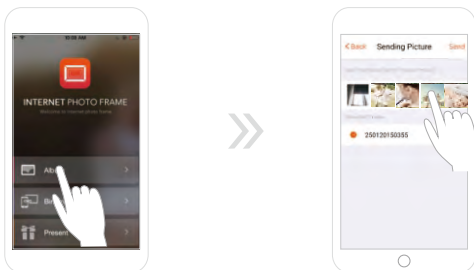

➤ Podłącz urządzenie mobilne do ramki

- Otwórz zainstalowaną aplikację do swojego urządzenia mobilnego
- Wybierz opcję „Bind Frame”
- Wpisz niepowtarzalny kod ramki i hasło
- Urządzenie mobilne może się łączyć z szeregiem ramek i wice versa

➤ Cyfrowa ramka do zdjęć już jest przygotowana do umieszczania w niej zdjęć

- W aplikacji w swoim urządzeniu mobilnym wybierz opcję „Album”
- Naciśnij „+”, aby wybrać zdjęcia z galerii w urządzeniu mobilnym (maks. 9 podczas jednej sesji)
- Liczba zdjęć przesyłanych w jednej sesji zależy od połączenia internetowego w urządzeniu mobilnym

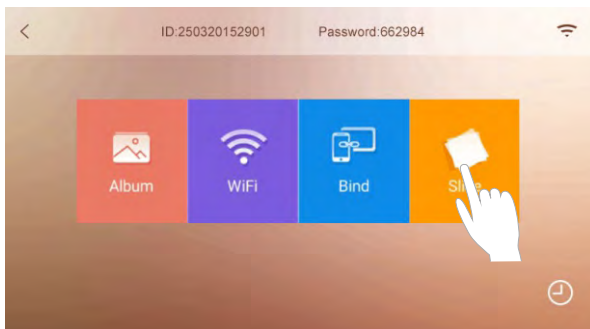

➤ Slajdy

- Wybierz sposób wyświetlania slajdów, kierując się udostępnionymi przykładami

➤ Zegar

- Naciśnij ikonę zegara, aby otworzyć menu
- Wybierz godziny, podczas których ramka ma być wyłączona

Specifications

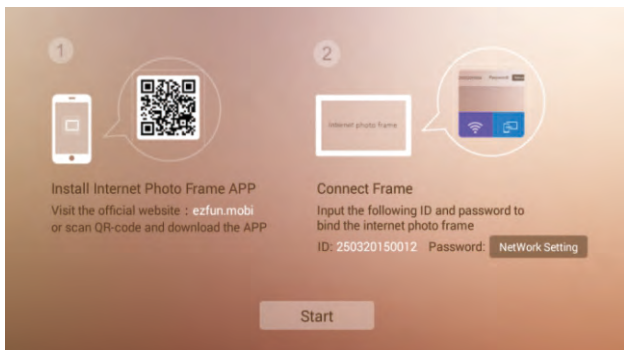

- Image resolution: **1280x800**
- Touch panel: **yes**
- Display: **HD LCD**
- Dimensions: **282 x 195 x 35 mm**
- Picture protected: **SHA256 encryption**
- Automatic rotate function: **yes**
- Built-in Wi-Fi module: **supports IEEE 802.11 b/g/n**

- Screen size: **10 inch**
- Radio frequency: **2.4GHz**
- Maximum broadcast power in mW: **20mW**
- dbi&dbm: **13dBm**

USP's

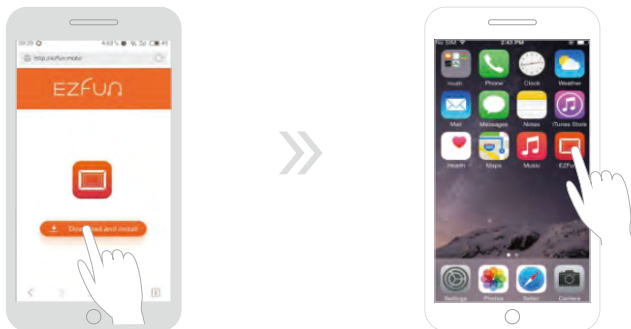

- Connected to the internet via Wi-Fi wireless technology to upload pictures from anywhere in the world
- Bright HD LCD display for consistently sharp pictures
- Intuitive touch screen for easy navigating through the menu
- 4 GB memory to store up to thousands of pictures (depending on size)
- Detachable kickstand and hanging hole; display automatically adjusts to landscape/portrait
- Protected against hacking
- Set-up in 3 simple steps; download the app via the on-screen QR code

➤ Transferência da aplicação e ativação da moldura

- Ligue a moldura fotográfica com a ajuda do adaptador de corrente incluído

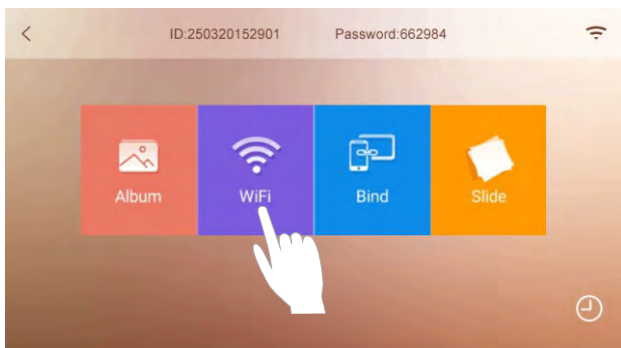

- Analise o código QR com o dispositivo móvel e instale a aplicação

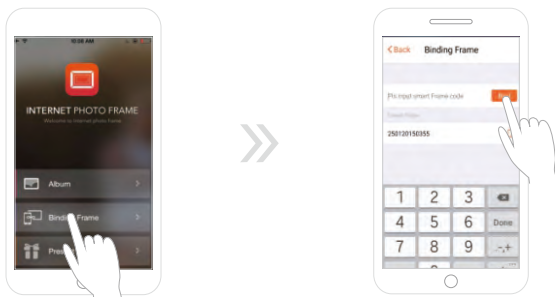

➤ Ligue a moldura fotográfica a uma rede Wi-Fi

- Selecione a rede Wi-Fi correta e introduza a palavra-passe

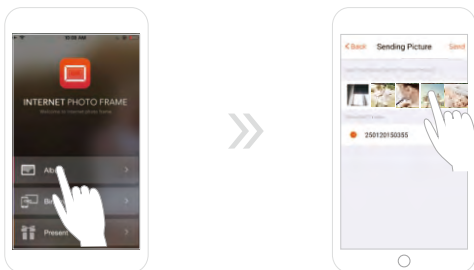

➤ Ligue o dispositivo móvel à moldura

- Abra a aplicação instalada no dispositivo móvel
- Selecione "Bind Frame" (Associar moldura)
- Introduza o código e a palavra-passe únicos da moldura
- É possível ligar um dispositivo móvel a várias molduras e vice-versa

➤ A moldura fotográfica está pronta para receber imagens

- Na aplicação do dispositivo móvel, selecione “Album” (Álbum)
- Prima “+” para seleccionar imagens da galeria no dispositivo móvel (máximo de 9 por sessão)
- Dependendo da ligação à Internet do dispositivo móvel, pode enviar mais ou menos fotografias numa única sessão

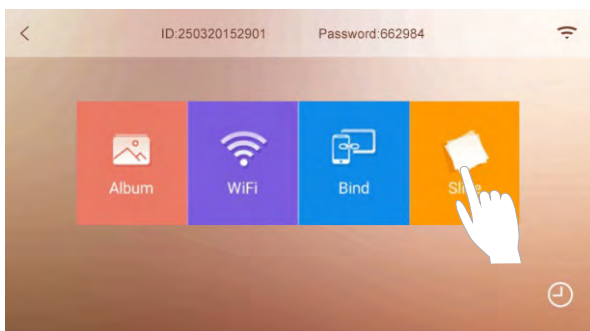

➤ Apresentação

- Selecione a apresentação de imagens preferida, observando os diferentes exemplos

➤ Relógio

- Prima o relógio para abrir o menu
- Selecione as horas durante as quais a moldura deve estar desligada

➤ Descărcare aplicație și conectare ramă

- Alimentați rama foto cu internet cu ajutorul adaptorului de alimentare inclus

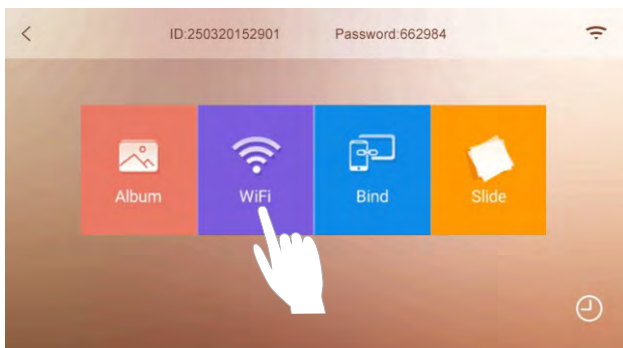

- Scanați codul QR cu ajutorul dispozitivului mobil și instalați aplicația

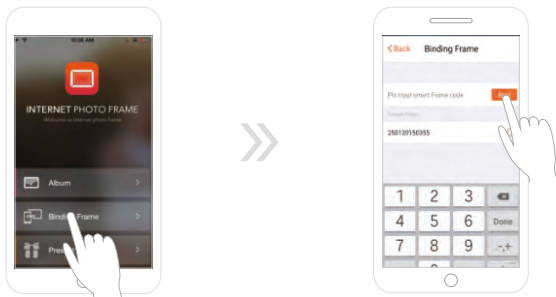

➤ Conectați rama foto cu internet la Wi-Fi

- Selectați rețeaua Wi-Fi corectă și introduceți parola

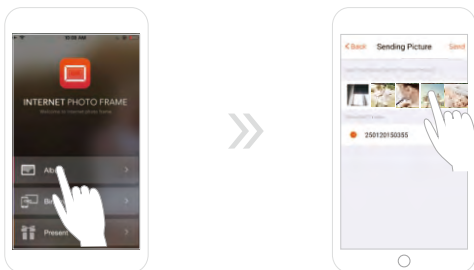

➤ Conectați dispozitivul mobil la ramă

- Deschideți aplicația instalată pe dispozitivul dvs. mobil
- Selectați „Legare ramă”
- Tastați codul unic al ramei și parola
- Un dispozitiv mobil poate conecta mai multe rame și vice versa

➤ Rama foto cu internet este gata să primească fotografii

- În aplicația de pe dispozitivul mobil, selectați „Album”
- Apăsați pe „+” pentru a selecta imaginile din galeria de pe dispozitivul dvs. mobil (max. 9 per sesiune)
- În funcție de conexiunea la internet a dispozitivului mobil, se pot trimite mai multe sau mai puține imagini într-o singură sesiune

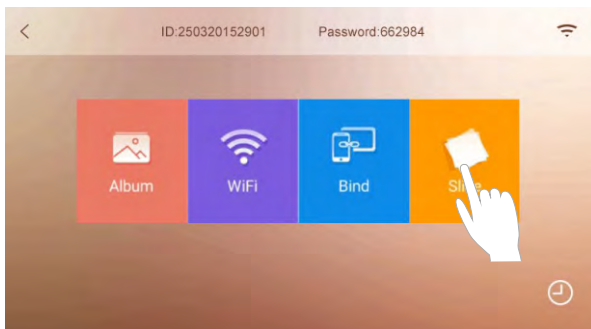

➤ Imagini expuse

- Selectați modul în care doriți să se deruleze expunerea de imagini, prin urmărirea exemplelor

➤ Ceas

- Apăsați ceasul pentru a deschide meniul.
- Selectați intervalul orar în care doriți ca rama să fie dezactivată

➤ Ram för nedladdning av program och anslutning

- Strömförsörj internet-fotoramen med medföljande strömadapter

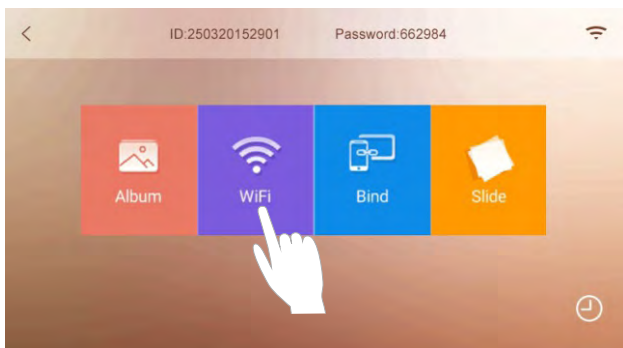

- Skanna QR-koden med den mobila enheten och installera appen

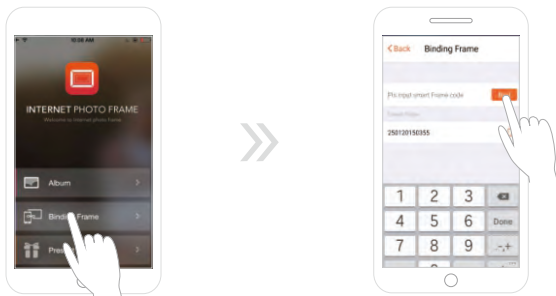

➤ Anslut internet-fotoramen till Wi-Fi

- Välj rätt Wi-Fi-nätverk och ange lösenordet

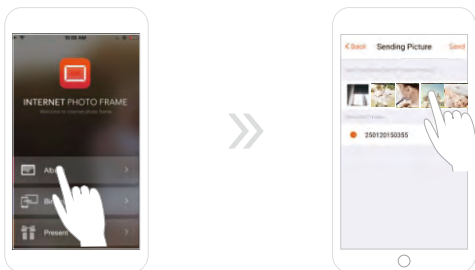

➤ Anslut den mobila enheten till ramen

- Öppna det installerade programmet på den mobila enheten
- Välj "Bind Frame" (koppla ram)
- Skriv in den unika ramkoden och det unika lösenordet
- En mobil enhet kan ansluta till flera ramar och vice versa

➤ Internet-fotoramen är redo att ta emot bilder

- I programmet på din mobila enhet väljer du "Album"
- Tryck på "+" för att välja bilder från galleriet på din mobila enhet (max. 9 per session)
- Beroende på internet-anslutningen för den mobila enheten kan fler eller färre bilder skickas i en session

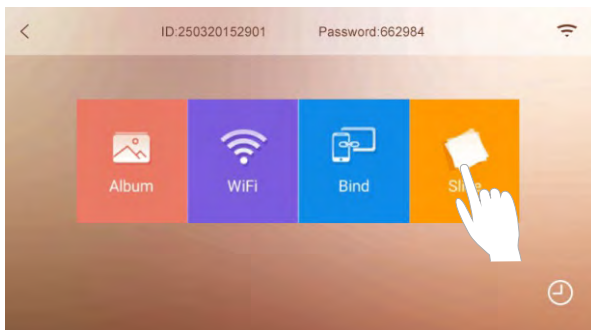

➤ Bildspel

- Välj hur du vill att bildspelet ska köras genom att titta på exemplen

➤ Klocka

- Tryck på klockan för att öppna menyn
- Välj de timmar då ramen ska vara avstängd

USP's

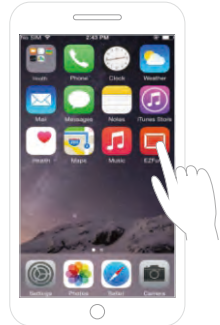

- Ansluten till internet via trådlös Wi-Fi-teknik för att ladda upp bilder var som helst i världen
- Ljus HD LCD-skärm för genomgående skarpa bilder
- Intuitiv pekskärm för enkel navigering i menyn
- 4 GB minne för lagring av upp till tusentals bilder (beroende på storlek)
- Löstagbart stöd och upphängningshåll. Skärmen justeras automatiskt till liggande/stående
- Skyddad mot hackning
- Installation i 3 enkla steg. Hämta appen via QR-koden på skärmen

➤ Uygulamayı İndirme ve Çerçeveni Bağlama

- İnternet özellikli fotoğraf çerçevenize, birlikte verilen güç adaptörüyle güç sağlayın

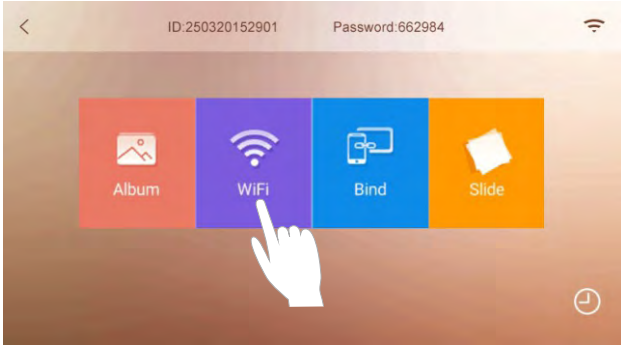

- Mobil cihazınızla QR kodunu tarayın ve uygulamayı yükleyin

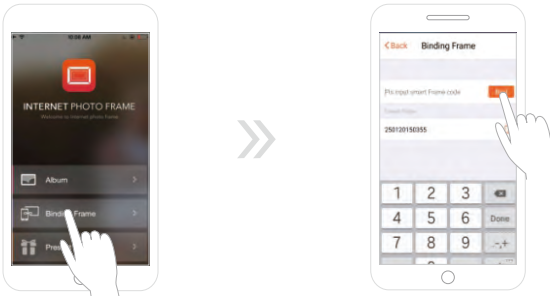

➤ İnternet özellikli fotoğraf çerçevesini Wi-Fi'ye bağlayın

- Doğru Wi-Fi ağını seçin ve parolayı girin

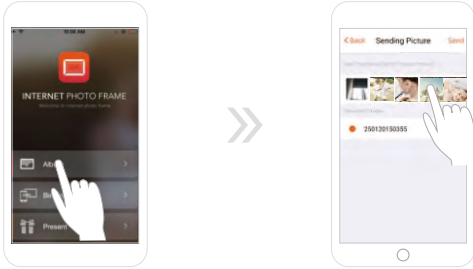

➤ Mobil cihazı çerçeveye bağlayın

- Mobil cihazınıza yüklenen uygulamayı açın
- "Bind Frame" (Çerçeveyi Bağla) ögesini seçin
- Benzersiz çerçeve kodunu ve parolasını yazın
- Bir mobil cihaz birden fazla çerçeveye ve bir çerçeve de birden fazla mobil cihaza bağlanabilir

➤ İnternet Özellikli Fotoğraf Çerçevesi fotoğraf almaya hazırdır

- Mobil cihazınızdaki uygulamada "Album" (Albüm) öğesini seçin
- Mobil cihazınızın galerisinden resim seçmek için "+" tuşuna basın (oturum başına en fazla 9 resim)
- Mobil cihazın internet bağlantısına bağlı olarak bir oturumda daha az veya daha çok fotoğraf gönderilebilir

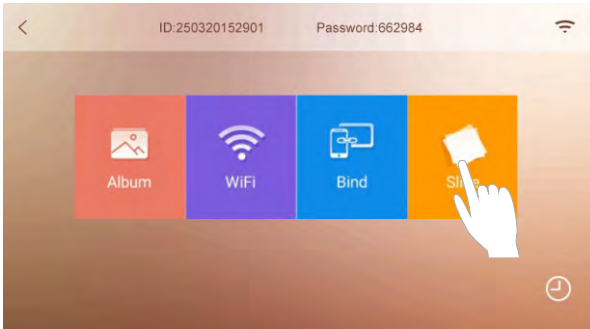

➤ Slayt

- Slayt gösterisinin nasıl ilerlemesini istediğinizi örneklerle bakarak seçin

➤ Saat

- Menüü açmak için saate basın
- Çerçevenin kapalı olması gereken saatleri belirleyin
