

Data sheet:

Network TV media player

Product code : MD-273
 Product name : Network TV media player
 EAN code : 8716502023301

Connect a notebook or desktop PC with the push of a button to a wireless network

With the Network TV Media Player, you can watch digital films, view photographs and play music directly on a TV. The product supports all the common types of media file with Full HD (1080p) quality for an optimal visual experience

The Network TV Media Player automatically connects to other UPnP AV devices (Universal Plug and Play Audio and Video) in the network, such as a PC or Home Storage Center, so that you can easily access and play digital files saved on the network via the intuitive menu

The product has two USB ports to which an external hard disk or USB stick can be connected. Thanks to the remote control, you have the freedom to play files from the comfort of your chair

The following online applications are supported and can be played directly on your TV:

- Picasa by Google / Flickr by Yahoo: view your photograph albums or those of your friends and family.
- MediaFly: view free Internet videos
- YouTube XL: view your favourite YouTube videos
- StockMarketWidget: remain informed of the latest stock exchange information.
- WeatherWidget: remain informed of the local weather forecast.
- vTuner: listen to all your favourite Internet radio stations via your stereo system using the media player.
