I Información acerca del producto

I-1 Contenido del paquete

1

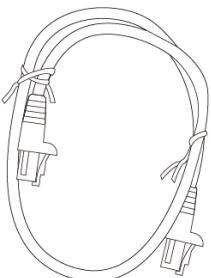

2

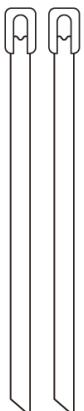

4

5

6

7

8

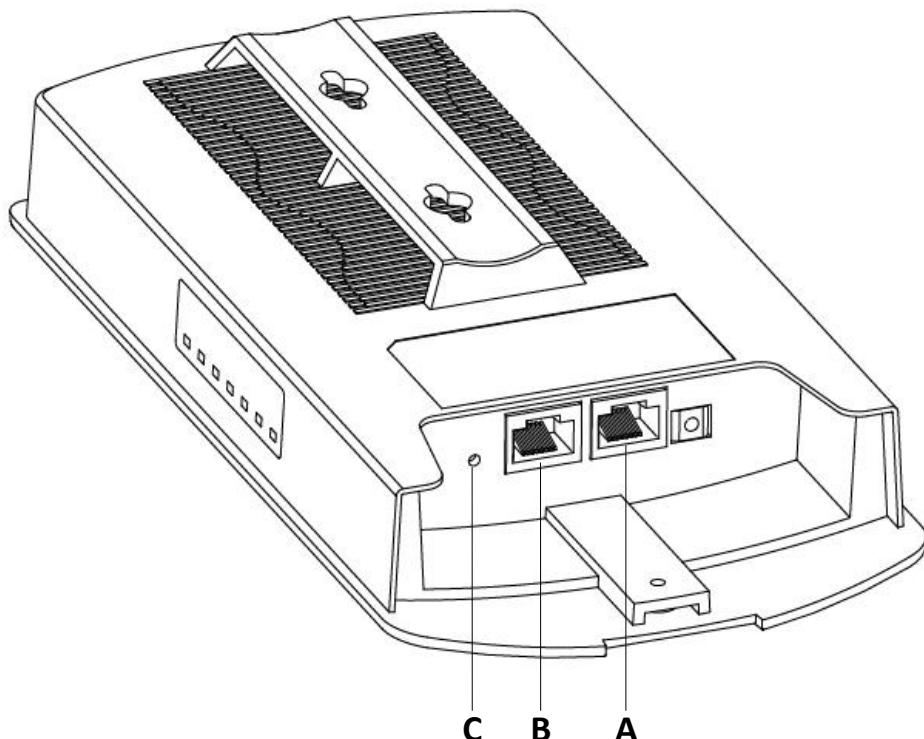

- 1.** Punto de acceso OAP1300
- 2.** Plantilla para tornillos del soporte de pared
- 3.** Conjunto de tornillos del soporte de pared
- 4.** CD
- 5.** Guía de instalación rápida
- 6.** Cable Ethernet
- 7.** 2 abrazaderas para montaje en poste
- 8.** 2 antenas

I-2 Requisitos del sistema

- Módem enrutador DSL/Cable existente
- Ordenador con navegador web para configurar el punto de acceso

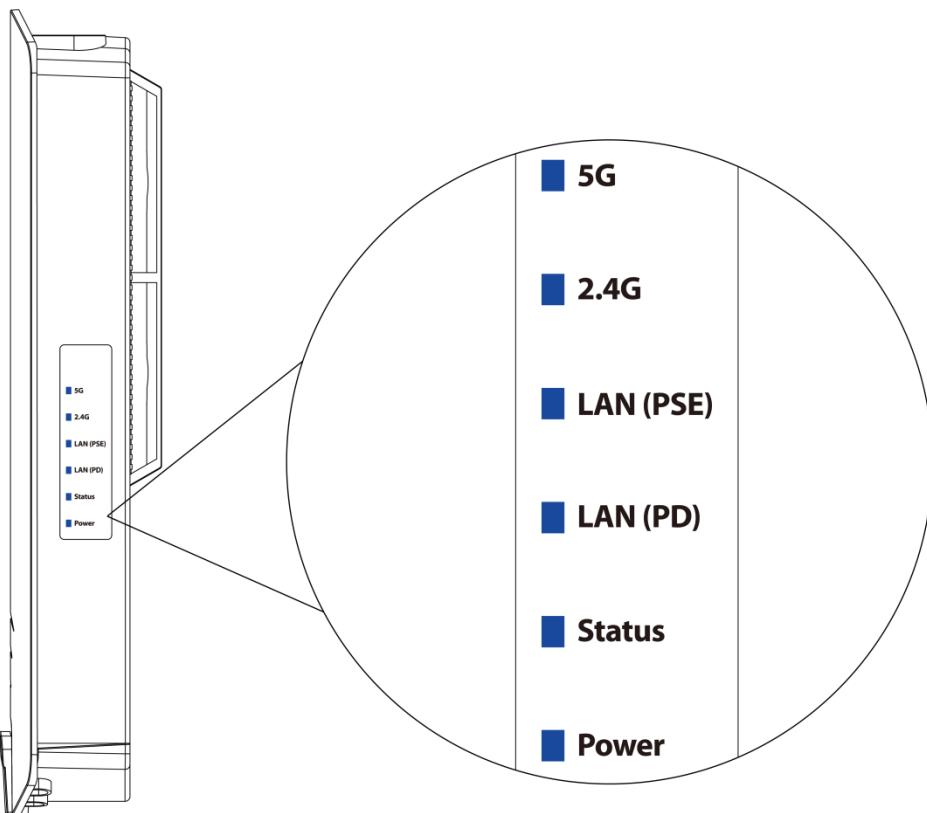

I-3 Descripción del dispositivo

Puertos y botones

A	LAN 1 ENTRADA POE	Puerto LAN con PoE (Power over Ethernet) entrada
B	LAN 2 SALIDA POE	Puerto LAN con salida PoE
C	Restablecer	Botón Restablecer

I-4 Estado del LED

LED	Estado del LED	Descripción
5 G (WLAN)	Encendido	Conexión inalámbrica habilitada.
	Apagado	Inalámbrico deshabilitado.
2.4 G (WLAN)	Encendido	Conexión inalámbrica habilitada.
	Apagado	Inalámbrico deshabilitado.
LAN (PSE)	Encendido	Puerto LAN conectado.
	Parpadeante	Actividad (transmisión y recepción)
	Apagado	Puerto LAN no conectado.
LAN (PD)	Encendido	Puerto LAN conectado.
	Parpadeante	Actividad (transmisión y recepción)
	Apagado	Puerto LAN no conectado.
Estado	Encendido	Arranque del punto de acceso.
	Apagado	No se produjo ningún error.
Alimentación	Encendido	El punto de acceso está encendido.
	Parpadeante	Actualizando el firmware.
	Apagado	El punto de acceso está apagado.

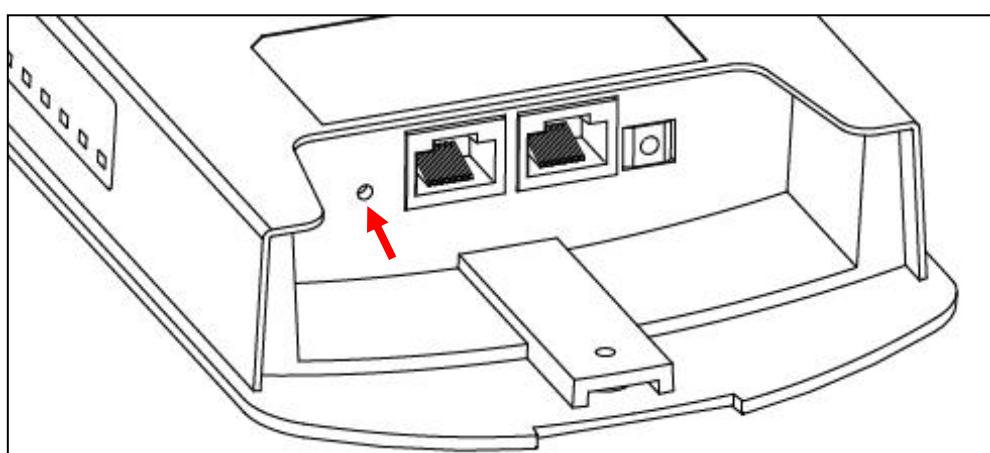

I-5 Restablecer

Si tiene problemas con su punto de acceso, puede restablecer el dispositivo a la configuración de fábrica. Esto restablece todas las configuraciones predeterminadas.

1. Pulse y mantenga pulsado el botón Restablecer del punto de acceso durante por lo menos 10 segundos y a continuación suelte el botón.

Puede ser necesario usar una aguja u otro objeto puntiagudo similar para pulsar el botón Restablecer.

2. Espere a que se reinicie el punto de acceso. El punto de acceso está listo para la configuración cuando el led está **azul**.

II Instalación rápida y selección de modo

Cada unidad puede funcionar como punto de acceso autónomo (**Modo AP**), como repetidor (**Modo Repetidor**), como parte de un array de AP (**Modo AP gestionado**) o como puente cliente (**Modo puente cliente**).

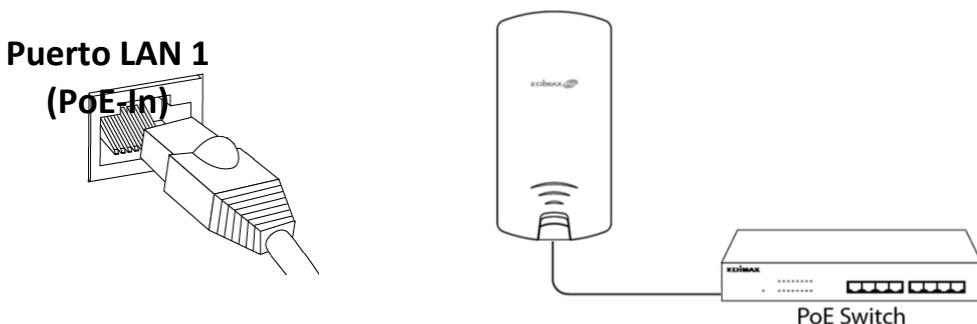

Siga los pasos del modo predeterminado que se indican a continuación y seleccione el modo de funcionamiento deseado.

II-1 Modo predeterminado: Modo Punto de acceso

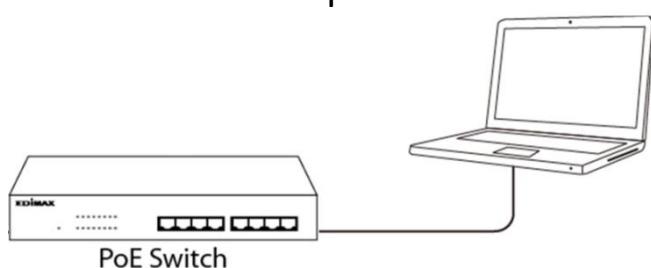

1. Configure la dirección IP de su ordenador en **192.168.2.x** donde **x** es un número comprendido entre **3 – 100**. Si no está seguro de cómo hacerlo, consulte la sección del apéndice del manual de usuario para más información.

 **Compruebe que no haya otras conexiones de red activas en su ordenador y desconecte las conexiones wifi y otras conexiones Ethernet.**

2. Conecte un cable Ethernet al puerto **LAN 1 (PoE-In)** del punto de acceso y el interruptor PoE para encender el punto de acceso.

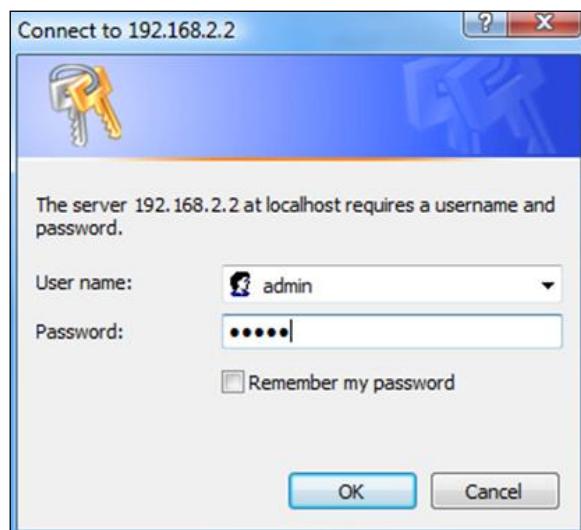

3. Espere a que el dispositivo se inicie. El dispositivo está listo cuando el LED de alimentación permanece encendido en color **azul**.
4. Conecte un ordenador al interruptor usando un cable Ethernet.

- 5.** Ingrese la dirección IP predeterminada del dispositivo 192.168.2.2 en la barra de direcciones URL del navegador web.

- 6.** Se le pedirá que indique un nombre de usuario y una contraseña. Introduzca el nombre de usuario predeterminado "admin" y la contraseña predeterminada "1234".

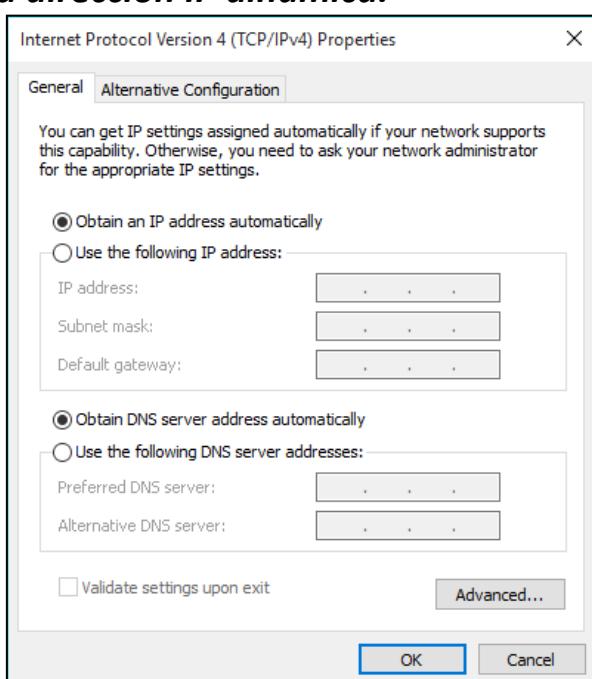

7. Aparecerá la pantalla de inicio “Información del sistema”:

The screenshot shows the EDIMAX Pro web interface. At the top, there is a navigation bar with links for Home, Logout, and Global (English). Below the navigation bar, there is a horizontal menu with tabs: Information, Network Settings, Wireless Settings, Management, Advanced, and Operation Mode. The Information tab is currently selected. On the left side, there is a sidebar with a tree view containing nodes for System Information, Wireless Clients, Wireless Monitor, DHCP Clients, and Log. The main content area is titled "System Information" and has two sections: "System" and "Wired LAN Port Settings". The "System" section contains a table with various system parameters, including Model (AP801F02F1968A), Product Name (AP801F02F1968A), Uptime (0 day 00:07:24), System Time (2012/01/01 00:07:06), Boot from (Internal memory), Firmware Version (1.8.1), MAC Address (80:1F:02:F1:96:8A), Management VLAN ID (1), IP Address (192.168.2.103), Default Gateway (192.168.2.70), DNS (192.168.2.70), and DHCP Server (192.168.2.70). The "Wired LAN Port Settings" section contains a table with two entries: LAN1 (Connected (100 Mbps Full-Duplex), Untagged Port / 1) and LAN2 (Disconnected (---), Untagged Port / 1).

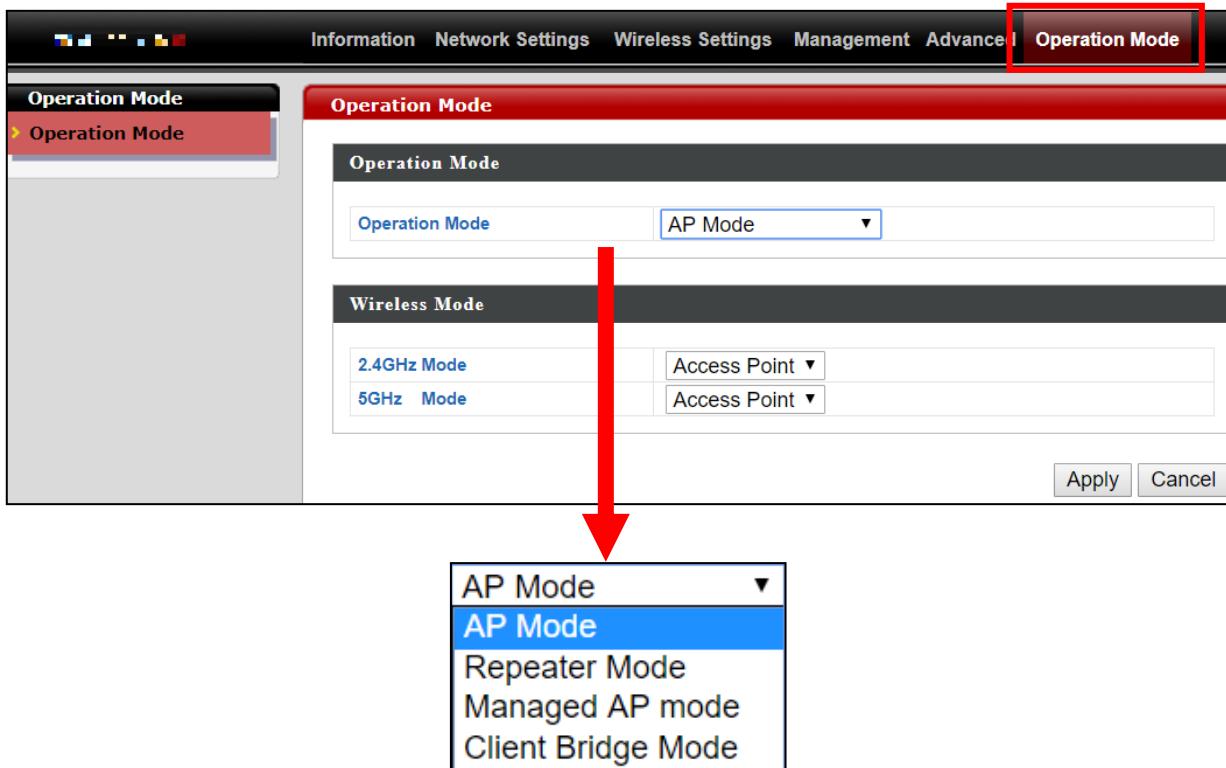

8. De forma predeterminada, el dispositivo está en modo AP.

Si no desea cambiar el modo de funcionamiento, vuelva a cambiar su ordenador a la dirección IP dinámica.

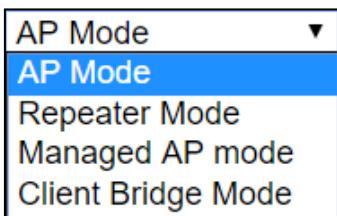

- 9.** Si desea cambiar a otro modo de funcionamiento, vaya a la ficha “Operation Mode (Modo de funcionamiento)” para seleccionar el modo de funcionamiento deseado. Siga los pasos de las secciones siguientes para cambiar el modo de funcionamiento.

II-2 Modo Repetidor

Desde el modo predeterminado anterior,

1. seleccione el modo repetidor en el menú desplegable del modo de funcionamiento:

2. Pulse “Apply (Aplicar)” y espere a que el dispositivo se reinicie en modo Repetidor:

3. Cuando se muestra la página del sistema, vaya a **Wireless Settings (Configuración inalámbrica)** → **Wireless Extender (Extensor inalámbrico)**.

A screenshot of the "Wireless Settings" interface. The top navigation bar includes icons for WiFi, LAN, WAN, and a signal strength meter. The tabs are: Information, Network Settings, Wireless Settings (highlighted in red), Management, Advanced, and Operation Mode. On the left, a sidebar shows sections for "Wireless Settings" (with "Wireless Extender" selected), "Profile List", "2.4GHz 11bgn" (Basic, Advanced, Security), "5GHz 11ac 11an" (Basic, Advanced, Security), and "WPS". The main content area is titled "Wireless Extender" and contains a "Site Survey" section with radio buttons for "Wireless 2.4G / 5G", "2.4G", and "5G", and a "Scan" button. Below it are two tables: "Wireless 2.4GHz" and "Wireless 5GHz", both with columns for Ch, SSID, MAC Address, Security, Signal (%), and Type. A note says "You can click Scan button to start.".

- 4.** Haga clic en Escanear para buscar y mostrar todos los SSID disponibles.

The screenshot shows the 'Wireless Extender' interface with a 'Site Survey' tab selected. There are two main sections: 'Wireless 2.4GHz (37 Accesspoints)' and 'Wireless 5GHz (29 Accesspoints)'. Each section contains a table with columns: Select, Ch, SSID, MAC Address, Security, Signal (%), and Type.

Wireless 2.4GHz (37 Accesspoints)

Select	Ch	SSID	MAC Address	Security	Signal (%)	Type
<input type="radio"/>	1	edimax.setup		NONE	100	b/g/n
<input type="radio"/>	2	EdiPlug.Setup		NONE	94	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	100	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	28	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	56	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	92	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	92	b/g/n

Wireless 5GHz (29 Accesspoints)

Select	Ch	SSID	MAC Address	Security	Signal (%)	Type
<input type="radio"/>	40			NONE	28	a/n
<input type="radio"/>	149	edimax.setup5G ce		NONE	36	ac
<input type="radio"/>	40	Edimax_Guest		WPA2PSK/AES	25	ac
<input type="radio"/>	40	EdimaxHQ		WPA2PSK/AES	36	ac
<input type="radio"/>	40	Edimax_Guest		WPA2PSK/AES	15	ac
<input type="radio"/>	40	EdimaxHQ		WPA2PSK/AES	15	ac

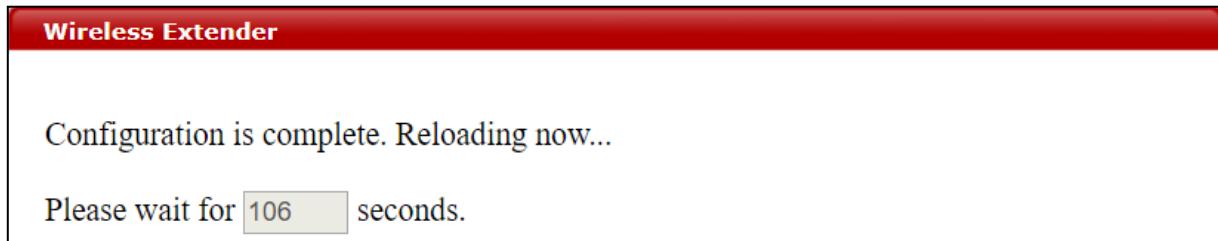

- 5.** Haga clic en el ícono de círculo para conectarse a una fuente SSID disponible. Los SSID puede configurarse independientemente para la frecuencia de 2.4 GHz y 5 GHz.

The screenshot shows the 'Wireless Create profile' dialog with the following fields:

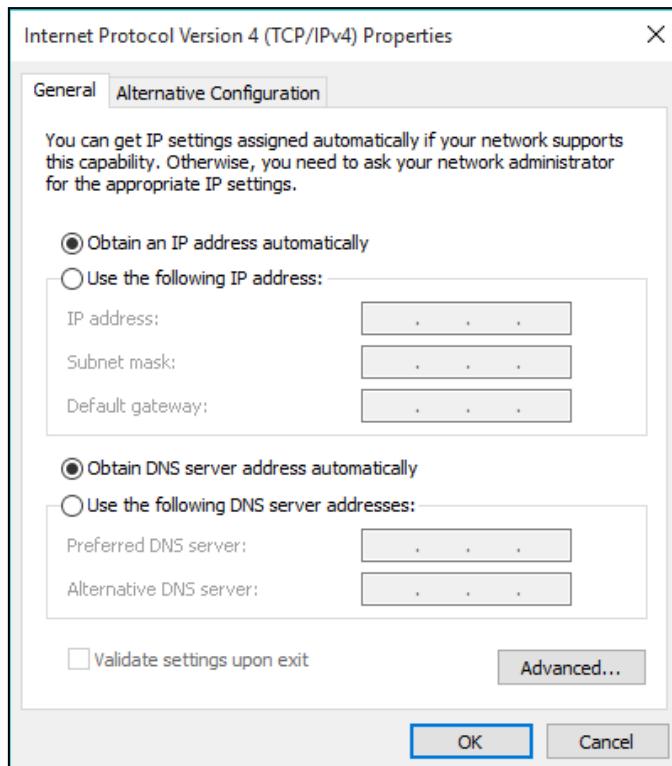

- SSID: **Edi_2.4**
- Extended SSID: **Edi_2.4**
- Authentication Method: **WPA-PSK**
- WPA Type: **WPA2 Only**
- Encryption Type: **AES**
- Pre-shared Key Type: **Passphrase**
- Pre-shared Key: (Empty field)

At the bottom are 'Connect' and 'Cancel' buttons.

- 6.** Edite el nuevo SSID extendido de acuerdo con sus preferencias e ingrese los datos de seguridad para la fuente SSID (p. ej., clave precompartida). Haga clic en “Connect (Conectar)” para continuar. Espere a que la configuración surta efecto:

- 7.** El dispositivo (que está en modo Repetidor) establecerá una conexión con el SSID fuente y repetirá el SSID extendido. El dispositivo se convertirá en un cliente DHCP del enrutador/raíz AP. Vuelva a cambiar el ordenador a la dirección IP dinámica.

- 8.** Para acceder a la interfaz de usuario web, compruebe la configuración de su enrutador/raíz AP, para determinar la nueva dirección IP del dispositivo. Ingrese la nueva dirección IP en el navegador para la interfaz de usuario web.

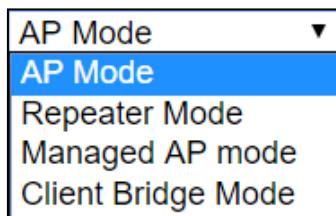

Si desea cambiar el modo de funcionamiento, restablezca el dispositivo a los valores predeterminados de fábrica (mediante la interfaz de usuario web o el restablecimiento del hardware).

II-3 Modo de puente cliente

Desde el modo predeterminado anterior,

1. seleccione el modo Puente cliente en el menú desplegable del modo de funcionamiento:

2. Pulse “Apply (Aplicar)” y espere a que el dispositivo se reinicie en modo Puente cliente:

3. Cuando se muestra la página del sistema, vaya a **Wireless Settings (Configuración inalámbrica)** → **Wireless Extender (Extensor inalámbrico)**.

- 4.** Haga clic en Escanear para buscar y mostrar todos los SSID disponibles.

The screenshot shows the 'Wireless Extender' software interface with the 'Site Survey' tab selected. At the top, there are radio buttons for 'Wireless 2.4G / 5G', '2.4G', and '5G', with 'Wireless 2.4G / 5G' being selected. A 'Scan' button is also present. Below the tabs, there are two sections: 'Wireless 2.4GHz (37 Accesspoints)' and 'Wireless 5GHz (29 Accesspoints)'. Each section contains a table with columns: Select, Ch, SSID, MAC Address, Security, Signal (%), and Type.

Wireless 2.4GHz (37 Accesspoints)

Select	Ch	SSID	MAC Address	Security	Signal (%)	Type
<input type="radio"/>	1	edimax.setup		NONE	100	b/g/n
<input type="radio"/>	2	EdiPlug.Setup		NONE	94	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	100	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	28	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	56	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	92	b/g/n
<input type="radio"/>	6	Edimax_Guest_2.4G		WPA2PSK/AES	92	b/g/n

Wireless 5GHz (29 Accesspoints)

Select	Ch	SSID	MAC Address	Security	Signal (%)	Type
<input type="radio"/>	40			NONE	28	a/n
<input type="radio"/>	149	edimax.setup5G ce		NONE	36	ac
<input type="radio"/>	40	Edimax_Guest		WPA2PSK/AES	25	ac
<input type="radio"/>	40	EdimaxHQ		WPA2PSK/AES	36	ac
<input type="radio"/>	40	Edimax_Guest		WPA2PSK/AES	15	ac
<input type="radio"/>	40	EdimaxHQ		WPA2PSK/AES	15	ac

- 5.** Haga clic en el ícono de círculo para conectarse a una fuente SSID disponible. Los SSID puede configurarse independientemente para la frecuencia de 2.4 GHz y 5 GHz.

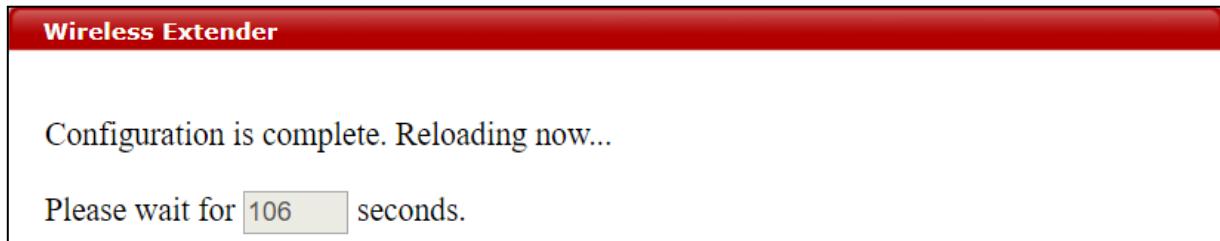

The screenshot shows the 'Wireless Create profile' dialog box. It contains fields for SSID, Authentication Method (set to WPA-PSK), WPA Type (set to WPA2 Only), Encryption Type (set to AES), Pre-shared Key Type (set to Passphrase), and a Pre-shared Key input field. At the bottom are 'Connect' and 'Cancel' buttons.

SSID	
Authentication Method	WPA-PSK ▾
WPA Type	WPA2 Only ▾
Encryption Type	AES ▾
Pre-shared Key Type	Passphrase ▾
Pre-shared Key	<input type="text"/>

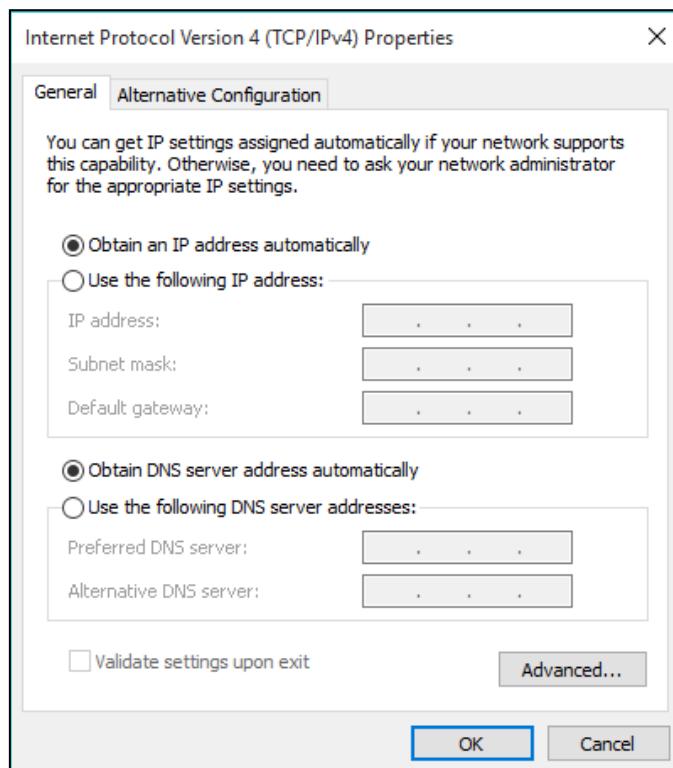

Connect Cancel

- 6.** Edítelos de acuerdo con sus preferencias e ingrese los datos de seguridad para la fuente SSID (p. ej., clave precompartida). Haga clic en “Connect (Conectar)” para continuar.

Espere a que la configuración surta efecto:

- 7.** El dispositivo (que está en modo Puente cliente) Recibirá la señal inalámbrica y la transmitirá a los dispositivos conectados al puente a través del cable Ethernet. El dispositivo se convertirá en un cliente DHCP del enrutador/raíz AP. Vuelva a cambiar el ordenador a la dirección IP dinámica.

- 8.** Para acceder a la interfaz de usuario web, compruebe la configuración de su enrutador/raíz AP, para determinar la nueva dirección IP del dispositivo. Ingrese la nueva dirección IP en el navegador para la interfaz de usuario web.

Si desea cambiar el modo de funcionamiento, restablezca el dispositivo a los valores predeterminados de fábrica (mediante la interfaz de usuario web o el restablecimiento del hardware).

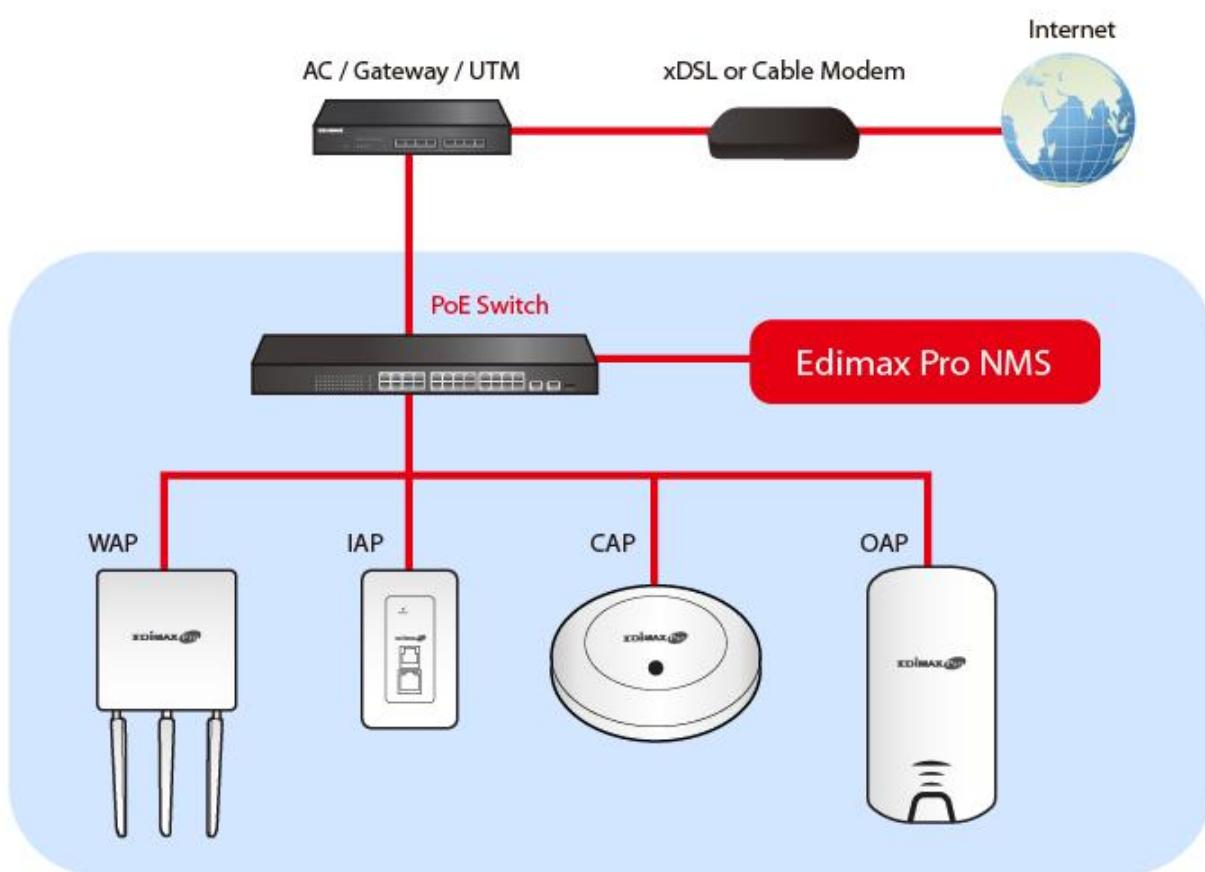

II-4 Modo AP gestionado

Controlador PA

Edimax Pro Network Management Suite (NMS) admite la gestión de un grupo de puntos de acceso, denominado también Array de AP.

El array de AP es gestionado por un *controlador de AP*, que puede monitorizar, configurar y administrar todos los APs gestionados.

Abajo se muestra una vista general del sistema:

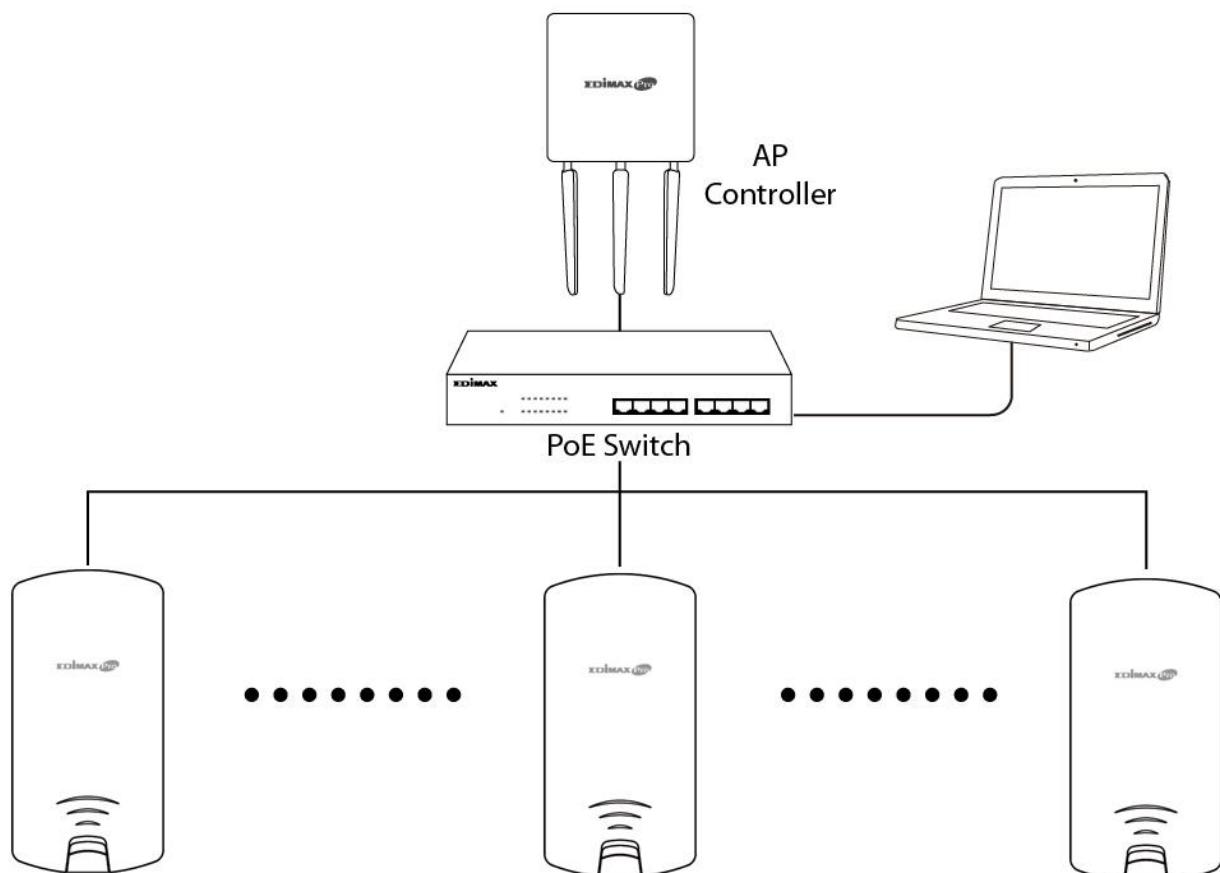

⚠ De forma predeterminada, el punto de acceso cambiará automáticamente de modo si la red tiene un controlador de AP.

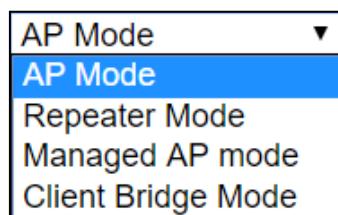

Para cambiar manualmente a “Modo AP gestionado”:

 **Compruebe si tiene el firmware más reciente del sitio Edimax para sus productos Edimax Pro.**

1. Conecte todos los AP a Ethernet o a un conmutador PoE actualmente conectado a un controlador de AP.

2. En el modo predeterminado anterior, seleccione Modo AP gestionado en el menú desplegable del modo de funcionamiento:

- 3.** Pulse “Apply (Aplicar)” y espere a que el dispositivo se reinicie en modo AP gestionado:

Espere unos minutos hasta que la configuración se sincronice.

II-5 Configuración básica

La configuración básica del punto de acceso es la siguiente:

- **dirección IP de LAN,**
- **SSID y seguridad 2.4 GHz y 5 GHz,**
- **nombre y contraseña de administrador y**
- **fecha y hora**

 **Le recomendamos que configure estos parámetros antes de usar el punto de acceso.**

Cada vez que aplique una nueva configuración al punto de acceso, la página web se recargará, como se muestra abajo:

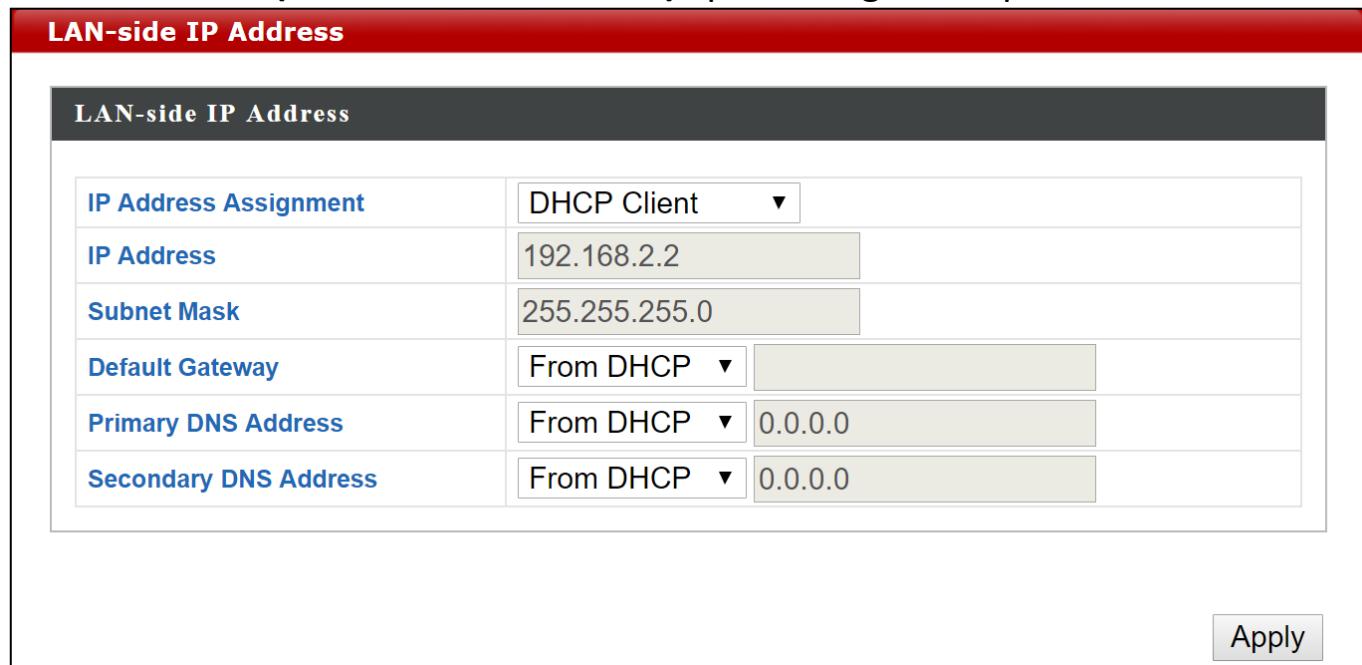

Configuration is complete. Reloading now...

Please wait for **19** seconds.

Las instrucciones de abajo le ayudarán a configurar estos parámetros:

Cambiar la dirección IP:

1. Vaya a “Network Settings (Configuración de red)” > “LAN-side IP Address (Dirección IP lado LAN)” para la siguiente pantalla:

LAN-side IP Address	
IP Address Assignment	DHCP Client
IP Address	192.168.2.2
Subnet Mask	255.255.255.0
Default Gateway	From DHCP
Primary DNS Address	From DHCP 0.0.0.0
Secondary DNS Address	From DHCP 0.0.0.0

Apply

- 2.** Introduzca la configuración de dirección IP que desee usar para su punto de acceso. Puede usar una dirección IP dinámica (DHCP) o estática, dependiendo de su entorno de red. Haga clic en “Apply (Aplicar)” para guardar los cambios y espere unos minutos hasta que el punto de acceso se vuelva a cargar.

Cuando cambie la dirección IP de su punto de acceso, debe usar la nueva dirección IP para acceder a la interfaz de configuración basada en navegador, en vez de la dirección IP predeterminada 192.168.2.2.

Cambiar el SSID de la red inalámbrica de 2.4 GHz

- Vaya a “Wireless Settings (Configuración inalámbrica)” > “2.4 GHz 11bgn” > “Basic (Básica)”.
- Introduzca el nuevo SSID de su red inalámbrica de 2.4 GHz en el campo “SSID1” y haga clic en “Apply (Aplicar)”.

The screenshot shows the 'Wireless Settings' interface. On the left, there's a sidebar with sections for '2.4GHz 11bgn' (selected), 'Advanced', 'Security', 'WDS', 'Guest Network', '5GHz 11ac 11an', 'Basic', 'Advanced', 'Security', 'WDS', 'Guest Network', and 'WPS'. The main area is titled 'Basic' under '2.4GHz Basic Settings'. It contains fields for 'Wireless' (radio buttons for 'Enable' and 'Disable'), 'Band' (dropdown set to '11b/g/n'), 'Enable SSID number' (dropdown set to '1'), 'SSID1' (text input field containing 'SSID1' with a red border), 'VLAN ID' (dropdown set to '1'), 'Auto Channel' (radio buttons for 'Enable' and 'Disable'), 'Auto Channel Range' (dropdown set to 'Ch 1 - 11'), 'Auto Channel Interval' (dropdown set to 'One day'), a checkbox for 'Change channel even if clients are connected', 'Channel Bandwidth' (dropdown set to 'Auto'), and 'BSS BasicRateSet' (dropdown set to 'all'). At the bottom right are 'Apply' and 'Cancel' buttons, both with red borders.

Para utilizar varios SSID de 2.4 GHz, abra el menú desplegable etiquetado “Enable SSID number (Habilitar número SSID)” y seleccione los SSID que desee. Después introduzca un nuevo SSID en los correspondientes campos numerados de abajo y haga clic en “Apply (Aplicar)”.

This screenshot shows a dropdown menu for 'Enable SSID number' set to '2'. Below it are two rows for 'SSID1' and 'SSID2'. Each row has an 'SSID' input field (containing 'SSID1' and 'SSID2' respectively with red borders) and a 'VLAN ID' input field (set to '1').

Enable SSID number	2
SSID1	VLAN ID 1
SSID2	VLAN ID 1

Configurar los parámetros de seguridad de la red inalámbrica de 2.4 GHz

1. Vaya a “**Wireless Settings (Configuración inalámbrica)**” > “**2.4 GHz 11bgn**” > “**Security (Seguridad)**”.
2. Seleccione un “Authentication Method (Método de autenticación)”, ingrese o seleccione los campos que correspondan y haga clic en “**Apply (Aplicar)**”.

The screenshot shows the 'Wireless Settings' interface with the '2.4GHz 11bgn' tab selected. On the left, a sidebar lists various settings under 'Basic', 'Advanced', and 'Security' (which is highlighted with a red box). The main panel displays '2.4GHz Wireless Security Settings' with fields for SSID, Broadcast SSID, Wireless Client Isolation, 802.11k, Load Balancing, Authentication Method (set to 'No Authentication'), and Additional Authentication (set to 'No additional authentication'). Below this is the '2.4GHz Wireless Advanced Settings' section, which includes Smart Handover Settings (with 'Smart Handover' set to 'Disable') and RSSI Threshold (-80 dB). At the bottom right are 'Apply' and 'Cancel' buttons, with 'Apply' also highlighted by a red box.

Si usa SSID múltiples, especifique qué SSID va a configurar usando el menú desplegable “SSID”.

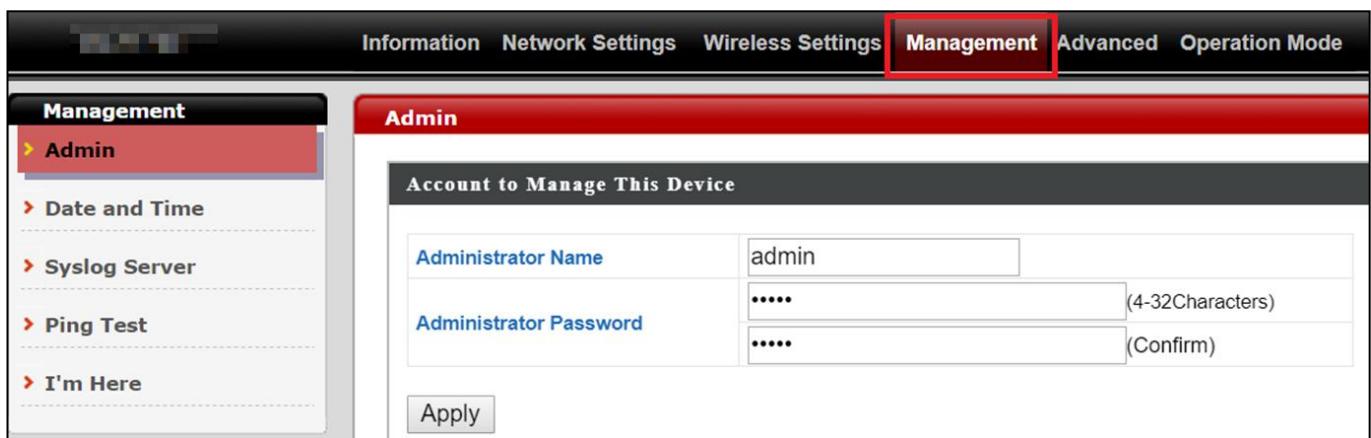

This screenshot shows the '2.4GHz Wireless Security Settings' configuration page. It includes fields for SSID, Broadcast SSID, Wireless Client Isolation (set to 'Disable'), 802.11k, Load Balancing, Authentication Method (set to 'No Authentication'), and Additional Authentication (set to 'No additional authentication'). The 'SSID' field is currently empty and highlighted with a blue selection bar.

Cambiar el SSID y los parámetros de la configuración de seguridad de la red inalámbrica de 5 GHz

Siga los siguientes pasos expuestos en “Cambiar el SSID de la red inalámbrica de 2.4 GHz” y “Configurar los parámetros de seguridad de la red inalámbrica de 2.4 GHz”, pero eligiendo la opción 5 GHz.

Cambiar el nombre de administrador y la contraseña

1. Vaya “Management (Gestión)” > “Admin (Administrador)” como se muestra abajo:

2. Complete los campos “Administrator Name (Nombre de administrador)” y “Administrator Password (Contraseña de administrador)” y haga clic en “Apply (Aplicar)”.

Cambiar la fecha y la hora

- Vaya a “Management (Gestión)” > “Date and Time (Fecha y hora)”.

The screenshot shows the TP-Link Management interface with the following details:

- Management** tab is selected.
- Date and Time** is highlighted in red in the left sidebar.
- Date and Time Settings**:
 - Local Time: Year 2012, Month Jan, Day 1, Hours 0, Minutes 00, Seconds 00.
 - Acquire Current Time from Your PC button.
- NTP Time Server**:
 - Use NTP: Enable
 - Auto Daylight Saving: Enable
 - Server Name: User-Defined
 - Update Interval: 24 (Hours)
- Time Zone**:
 - Time Zone: (GMT+08:00) Taipei, Taiwan
- Buttons**: Apply and Cancel.

- Establezca la hora y la zona horaria correctas de su punto de acceso usando los menús desplegables. El punto de acceso también es compatible con NTP (Network Time Protocol), por lo tanto también puede ingresar el nombre de host o la dirección IP de un servidor horario. Haga clic en "Apply (Aplicar)" cuando haya finalizado.

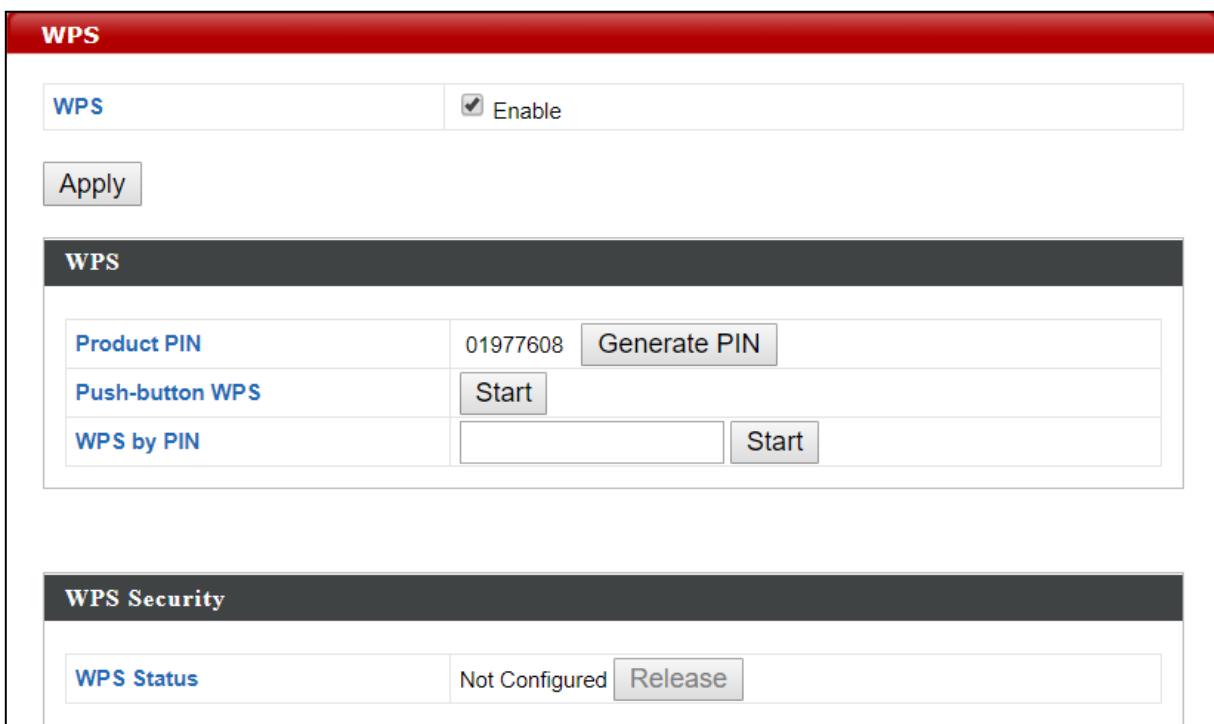

Puede usar el botón “Acquire Current Time from your PC (Adquirir hora actual de su PC)” si desea establecer el punto de acceso a la misma hora del PC.

Ya ha realizado la configuración básica de su punto de acceso. Consulte **III Instalación del dispositivo** para más información sobre la conexión del punto de acceso a un enrutador o un conmutador PoE.

II-6 Configuración wifi protegida (WPS)

La configuración wifi protegida es un modo simple de establecer conexiones entre dispositivos WPS compatibles. Puede usar el botón WPS o la página web de configuración para activar la función WPS del punto de acceso.

- 1.** Vaya “Wireless Settings (Configuración inalámbrica)” > “WPS” en la página web de configuración.
- 2.** Marque la casilla “Enable (Habilitar)” y haga clic en “Apply (Aplicar)”.

- 3.** En la línea del “Push-button WPS (Botón WPS)”, haga clic en “Start (Iniciar)” para activar la WPS del AP durante aproximadamente 2 minutos.
(Para más información sobre “WPS por PIN”, consulte el manual de usuario).
- 4.** En dos minutos, active el WPS de su dispositivo inalámbrico compatible con WPS. Consulte la documentación de su dispositivo inalámbrico para obtener información sobre la función WPS.
- 5.** Los dispositivos establecerán una conexión.

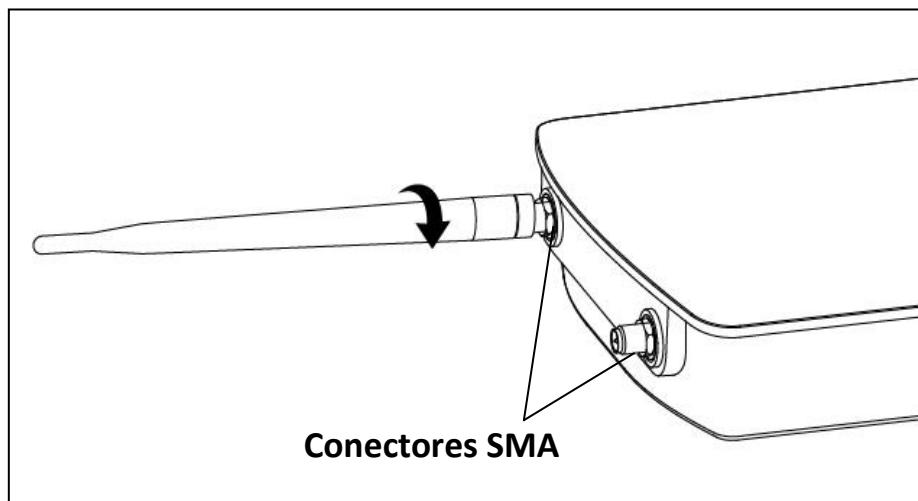

III Instalación del dispositivo

Después de finalizar los procesos de configuración anteriores, puede reubicar el punto de acceso en la ubicación que prefiera.

III-1 Antena

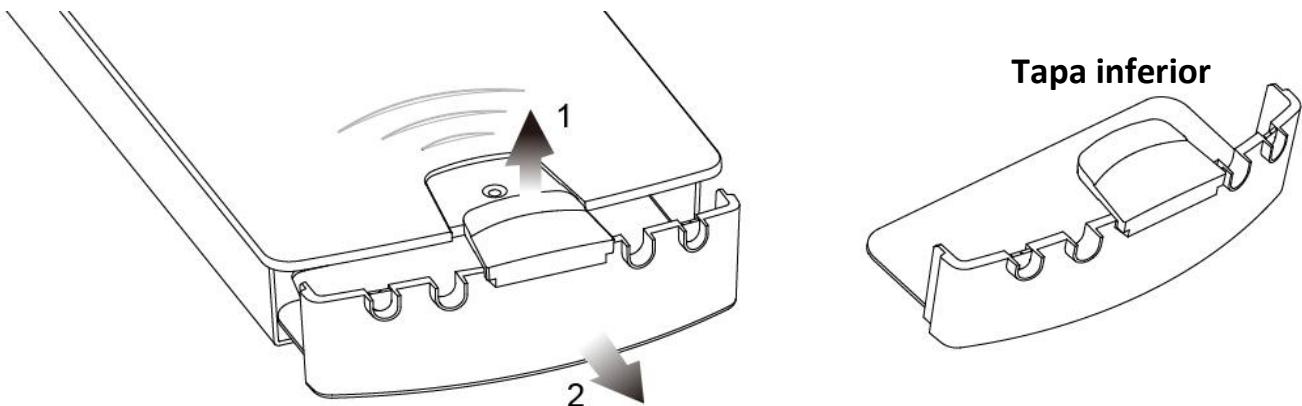

La antena debe estar atornillada en el punto de acceso.

Enrosque las dos antenas en sentido horario en los conectores SMA, como se muestra abajo:

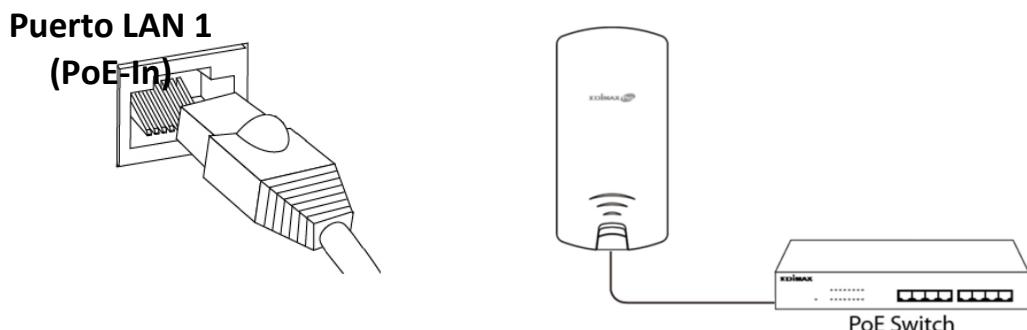

III-2 Conectar el punto de acceso en exteriores

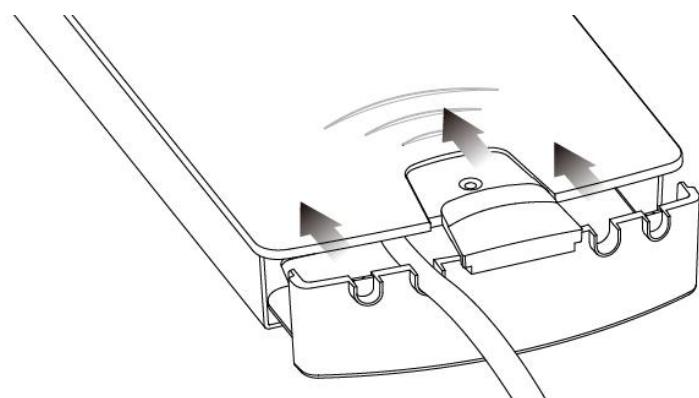

1. Retire la tapa de la parte inferior del punto de acceso 1) tirando el gancho hacia arriba y 2) tirando la tapa hacia abajo, como se muestra a continuación:

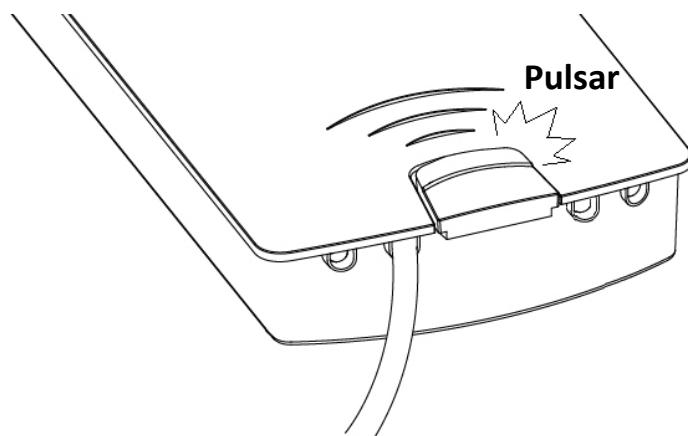

2. Conecte un cable Ethernet al puerto **LAN 1 (PoE-In)** del punto de acceso y el interruptor PoE para encender el punto de acceso.

3. El punto de acceso será alimentado por el conmutador PoE. Conecte otro cable Ethernet a la **LAN 2** si es necesario.
4. Vuelva a colocar la tapa dejando que el o los cables queden en las muescas de la tapa.

- 5.** Haga encajar el gancho en el punto de acceso y compruebe que no se salga fácilmente. La tapa sirve de diseño impermeable apto para uso en exteriores.

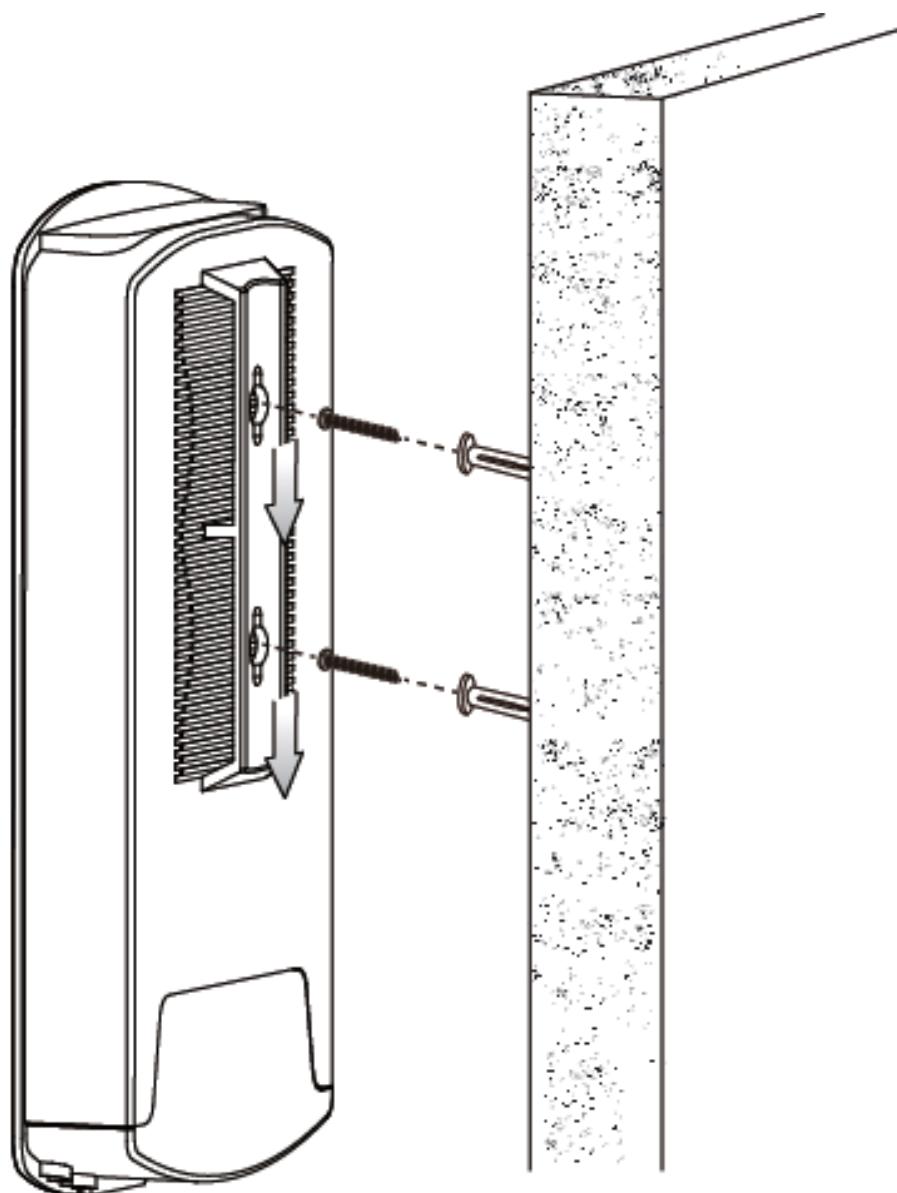

III-3 Montaje

Después de conectar el punto de acceso, móntelo de acuerdo a alguna de las opciones de montaje siguientes: **Montaje de pared o en poste**

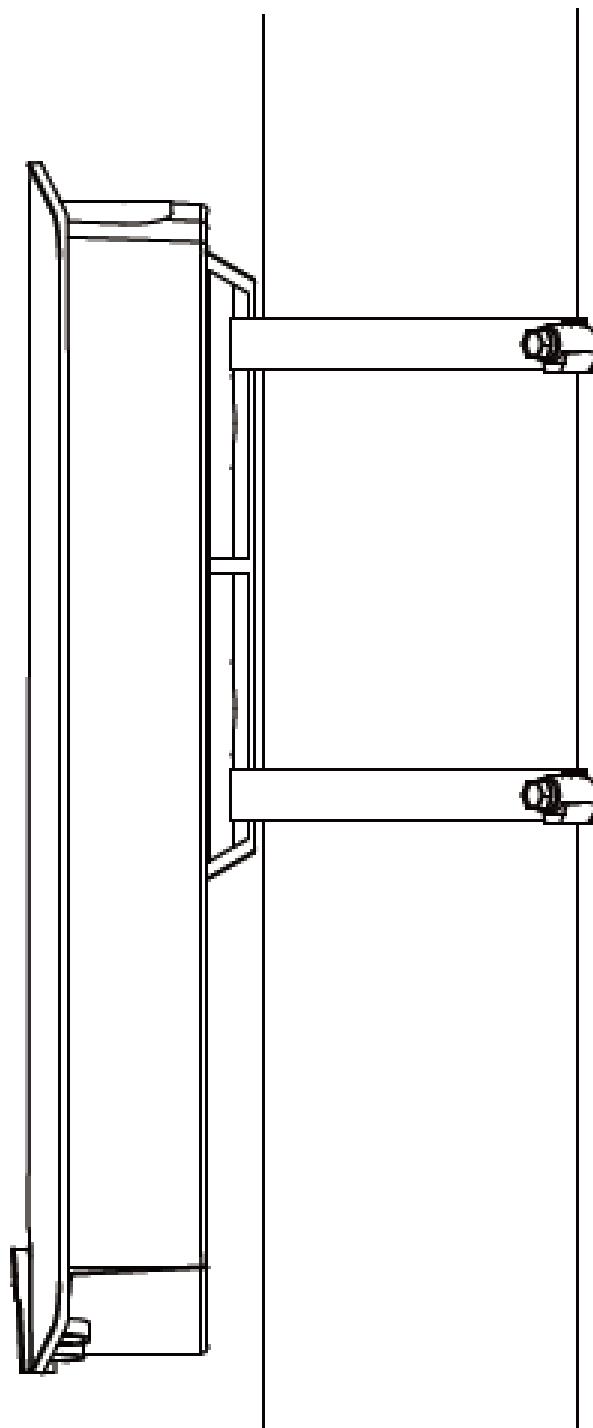

Montaje de pared

Fije el montaje y el punto de acceso a una pared usando la plantilla de montaje de pared y el juego de tornillos de montaje suministrado.

Montaje en poste

Fije el montaje y el punto de acceso a un poste usando las abrazaderas de fijación suministradas.

Professional installation warning:

This device is point-to-multi-point device. The general user should not attempt to install or change settings, it needs to be installed by a qualified personal who has RF exposure and related rule knowledge or technology.

The installation position and output power does not exceed the limit set forth in US Rule CFR 47 part 15 section 15.247 & 15.407. If violate the rule, could lead to serious federal penalty.

It is complies with §15.407 (a)(1)(i) requirement that the maximum e.i.r.p. at any elevation angle above 30 degrees as measured from the horizon must not exceed 125 mW (21 dBm).

About TDWR 5600-5650 MHz, installation and operation should with a minimum distance of 20 centimeters between the radiator and your body or nearby persons.

Use two type antenna specifications. One type antenna model name is 98623PRSX000, antenna type is dipole antenna with peak gain 4.58dBi for 2.4GHz; 6.18dBi for 5150-5250MHz; 6.22dBi for 5250-5350MHz; 6.12dBi for 5470-5725MHz; 6.05dBi for 5725-5850MHz. Other type antenna model name is C095-510399-A, antenna type is dipole antenna with peak gain 3dBi for 2.4GHz; 4dBi for 5150-5850MHz. Only use manufacturer approved antenna type of antenna.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio technician for help.

FCC Caution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

FCC Radiation Exposure Statement:

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body or nearby persons.

RED Compliance Statement

Compliance with 2014/53/EU Radio Equipment Directive (RED)

In accordance with Article 10.8(a) and 10.8(b) of the RED, the following table provides information on the frequency bands used and the maximum RF transmit power of the product for sale in the EU:

Frequency range (MHz)	Max. Transmit Power (dBm)
2412-2472	19.66 dBm
5500-5700	27.73 dBm

A simplified DoC shall be provided as follows: Article 10(9)

Hereby, Edimax Technology Co., Ltd. declares that the radio equipment type **AC1300 Outdoor AP** is in compliance with Directive 2014/53/EU

The full text of the EU declaration of conformity is available at the following internet address: <http://www.edimax.com/edimax/global/>

Safety

This equipment is designed with the utmost care for the safety of those who install and use it. However, special attention must be paid to the dangers of electric shock and static electricity when working with electrical equipment. All guidelines of this and of the computer manufacturer must therefore be followed at all times to ensure the safe use of the equipment.

EU Countries Intended for Use

The ETSI version of this device is intended for home and office use in Austria, Belgium, Bulgaria, Cyprus, Czech, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Turkey, and United Kingdom. The ETSI version of this device is also authorized for use in EFTA member states: Iceland, Liechtenstein, Norway, and Switzerland.

EU Countries Not Intended for Use

None

EU Declaration of Conformity

- English:** This equipment is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU, 2014/35/EU.
- Français:** Cet équipement est conforme aux exigences essentielles et autres dispositions de la directive 2014/53/EU, 2014/35/EU.
- Čeština:** Toto zařízení je v souladu se základními požadavky a ostatními příslušnými ustanoveními směrnic 2014/53/EU, 2014/35/EU.
- Polski:** Urządzenie jest zgodne z ogólnymi wymaganiami oraz szczególnymi warunkami określonymi Dyrektywą UE 2014/53/EU, 2014/35/EU.
- Română:** Acest echipament este în conformitate cu cerințele esențiale și alte prevederi relevante ale Directivei 2014/53/UE, 2014/35/UE.
- Русский:** Это оборудование соответствует основным требованиям и положениям Директивы 2014/53/EU, 2014/35/EU.
- Magyar:** Ez a berendezés megfelel az alapvető követelményeknek és más vonatkozó irányelveknek (2014/53/EU, 2014/35/EU).
- Türkçe:** Bu cihaz 2014/53/EU, 2014/35/EU direktifleri zorunlu istekler ve diğer hükümlerle ile uyumludur.
- Українська:** Обладнання відповідає вимогам і умовам директиви 2014/53/EU, 2014/35/EU.
- Slovenčina:** Toto zariadenie spĺňa základné požiadavky a ďalšie príslušné ustanovenia smerníc 2014/53/EU, 2014/35/EU.
- Deutsch:** Dieses Gerät erfüllt die Voraussetzungen gemäß den Richtlinien 2014/53/EU, 2014/35/EU.
- Español:** El presente equipo cumple los requisitos esenciales de la Directiva 2014/53/EU, 2014/35/EU.
- Italiano:** Questo apparecchio è conforme ai requisiti essenziali e alle altre disposizioni applicabili della Direttiva 2014/53/EU, 2014/35/UE.
- Nederlands:** Dit apparaat voldoet aan de essentiële eisen en andere van toepassing zijnde bepalingen van richtlijn 2014/53/EU, 2014/35/EU.
- Português:** Este equipamento cumpre os requisitos essenciais da Directiva 2014/53/EU, 2014/35/EU.
- Norsk:** Dette utstyret er i samsvar med de viktigste kravene og andre relevante regler i Direktiv 2014/53/EU, 2014/35/EU.
- Svenska:** Denna utrustning är i överensstämmelse med de väsentliga kraven och övriga relevanta bestämmelser i direktiv 2014/53/EU, 2014/35/EU.
- Dansk:** Dette udstyr er i overensstemmelse med de væsentligste krav og andre relevante forordninger i direktiv 2014/53/EU, 2014/35/EU.
- suomen kieli:** Tämä laite täyttää direktiivien 2014/53/EU, 2014/35/EU. oleelliset vaatimukset ja muut asiaankuuluvat määräykset.

FOR USE IN           
            
         

WEEE Directive & Product Disposal

At the end of its serviceable life, this product should not be treated as household or general waste. It should be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or returned to the supplier for disposal.

Declaration of Conformity

We, Edimax Technology Co., Ltd., declare under our sole responsibility, that the equipment described below complies with the requirements of the European Radio Equipment directives.

Equipment: **AC1300 Outdoor AP**

Model No.: **OAP1300**

The following European standards for essential requirements have been followed:

Directives 2014/53/EU

Spectrum	:	EN 300 328 V2.1.1 (2016-11)
		EN 301 893 V2.1.1 (2017-05)

Notice According to GNU General Public License Version 2

This product includes software that is subject to the GNU General Public License version 2. The program is free software and distributed without any warranty of the author. We offer, valid for at least three years, to give you, for a charge no more than the costs of physically performing source distribution, a complete machine-readable copy of the corresponding source code.

Das Produkt beinhaltet Software, die den Bedingungen der GNU/GPL-Version 2 unterliegt. Das Programm ist eine sog. „Free Software“, der Autor stellt das Programm ohne irgendeine Gewährleistungen zur Verfügung. Wir bieten Ihnen für einen Zeitraum von drei Jahren an, eine vollständige maschinenlesbare Kopie des Quelltextes der Programme zur Verfügung zu stellen – zu nicht höheren Kosten als denen, die durch den physikalischen Kopievorgang anfallen.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The “Program”, below, refers to any such program or work, and a “work based on the Program” means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term “modification”.) Each licensee is addressed as “you”.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep

intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License.

Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
